About us

“Our mission is to make education as engaging and accessible as entertainment.” - Fabio Martinetti

Founded in 2022 in Liechtenstein, **Legacy Network AG** leverages new technologies to create effective learning solutions for learners worldwide.

The journey began with a mind-map and a small group of passionate educators and tech enthusiasts who wanted to bridge the gap between technology and easily accessible quality education.

Vision

We live in a world where big tech companies know more about us and our behavior than we do. Modern technology is used to sell us products and make us neurologically addicted to various services.

The long-term vision of Legacy Network is to revolutionize education by creating a blockchain and AI powered ecosystem that incentivizes learners and makes education accessible globally.

Through artificial intelligence, we deliver personalized learning experiences tailored to individual goals and learning styles.

Our ecosystem integrates Legacy Token (\$LGCT) to gamify the learning journey, incentivizing users to engage with content, reach milestones, and apply their knowledge in the real-world.

The Silent Crisis

As things stand today, 20% of people in Europe suffer from a mental health illness that requires treatment (European Union, 2023). Harmful behaviours and traits, which severely impact quality of life but are not officially considered illnesses, are not included.

The average person today is plagued by: Diverse anxieties, sleep disturbances, recurring negative emotions as well as poor physical condition. These matters in turn negatively impact success in various key areas of life such as finances, relationships and health.

A stylized illustration of a person with dark hair, wearing a light-colored shirt, sitting at a desk and covering their face with their hands in a gesture of distress or despair. The background shows a blurred office environment with shelves and papers. Overlaid on the person's face and hands is a large, bold, red '20%' with a distressed, cracked texture.

20%

Approach

Our approach is grounded in a commitment to provide effective learning tools that are easy and fun to use. By combining game-like / interactive elements with evidence-based strategies, we create solutions that address today's challenges. Through our applications, users gain valuable insights and knowledge to navigate life's challenges effectively, resulting in a significant improvement of their life quality and overall success.

Products

Legacy Academy

Legacy Academy transforms personal development into an interactive adventure. Explore modules, absorb lessons and challenge yourself with mini-games all while earning rewards. It's accessible anytime, anywhere.

Legacy Token

The Legacy Token (\$LGCT) is a multi-chain utility and payment token. It is used across our ecosystem to process subscription and in-app purchase transactions. Furthermore, it grants access to several exciting features.

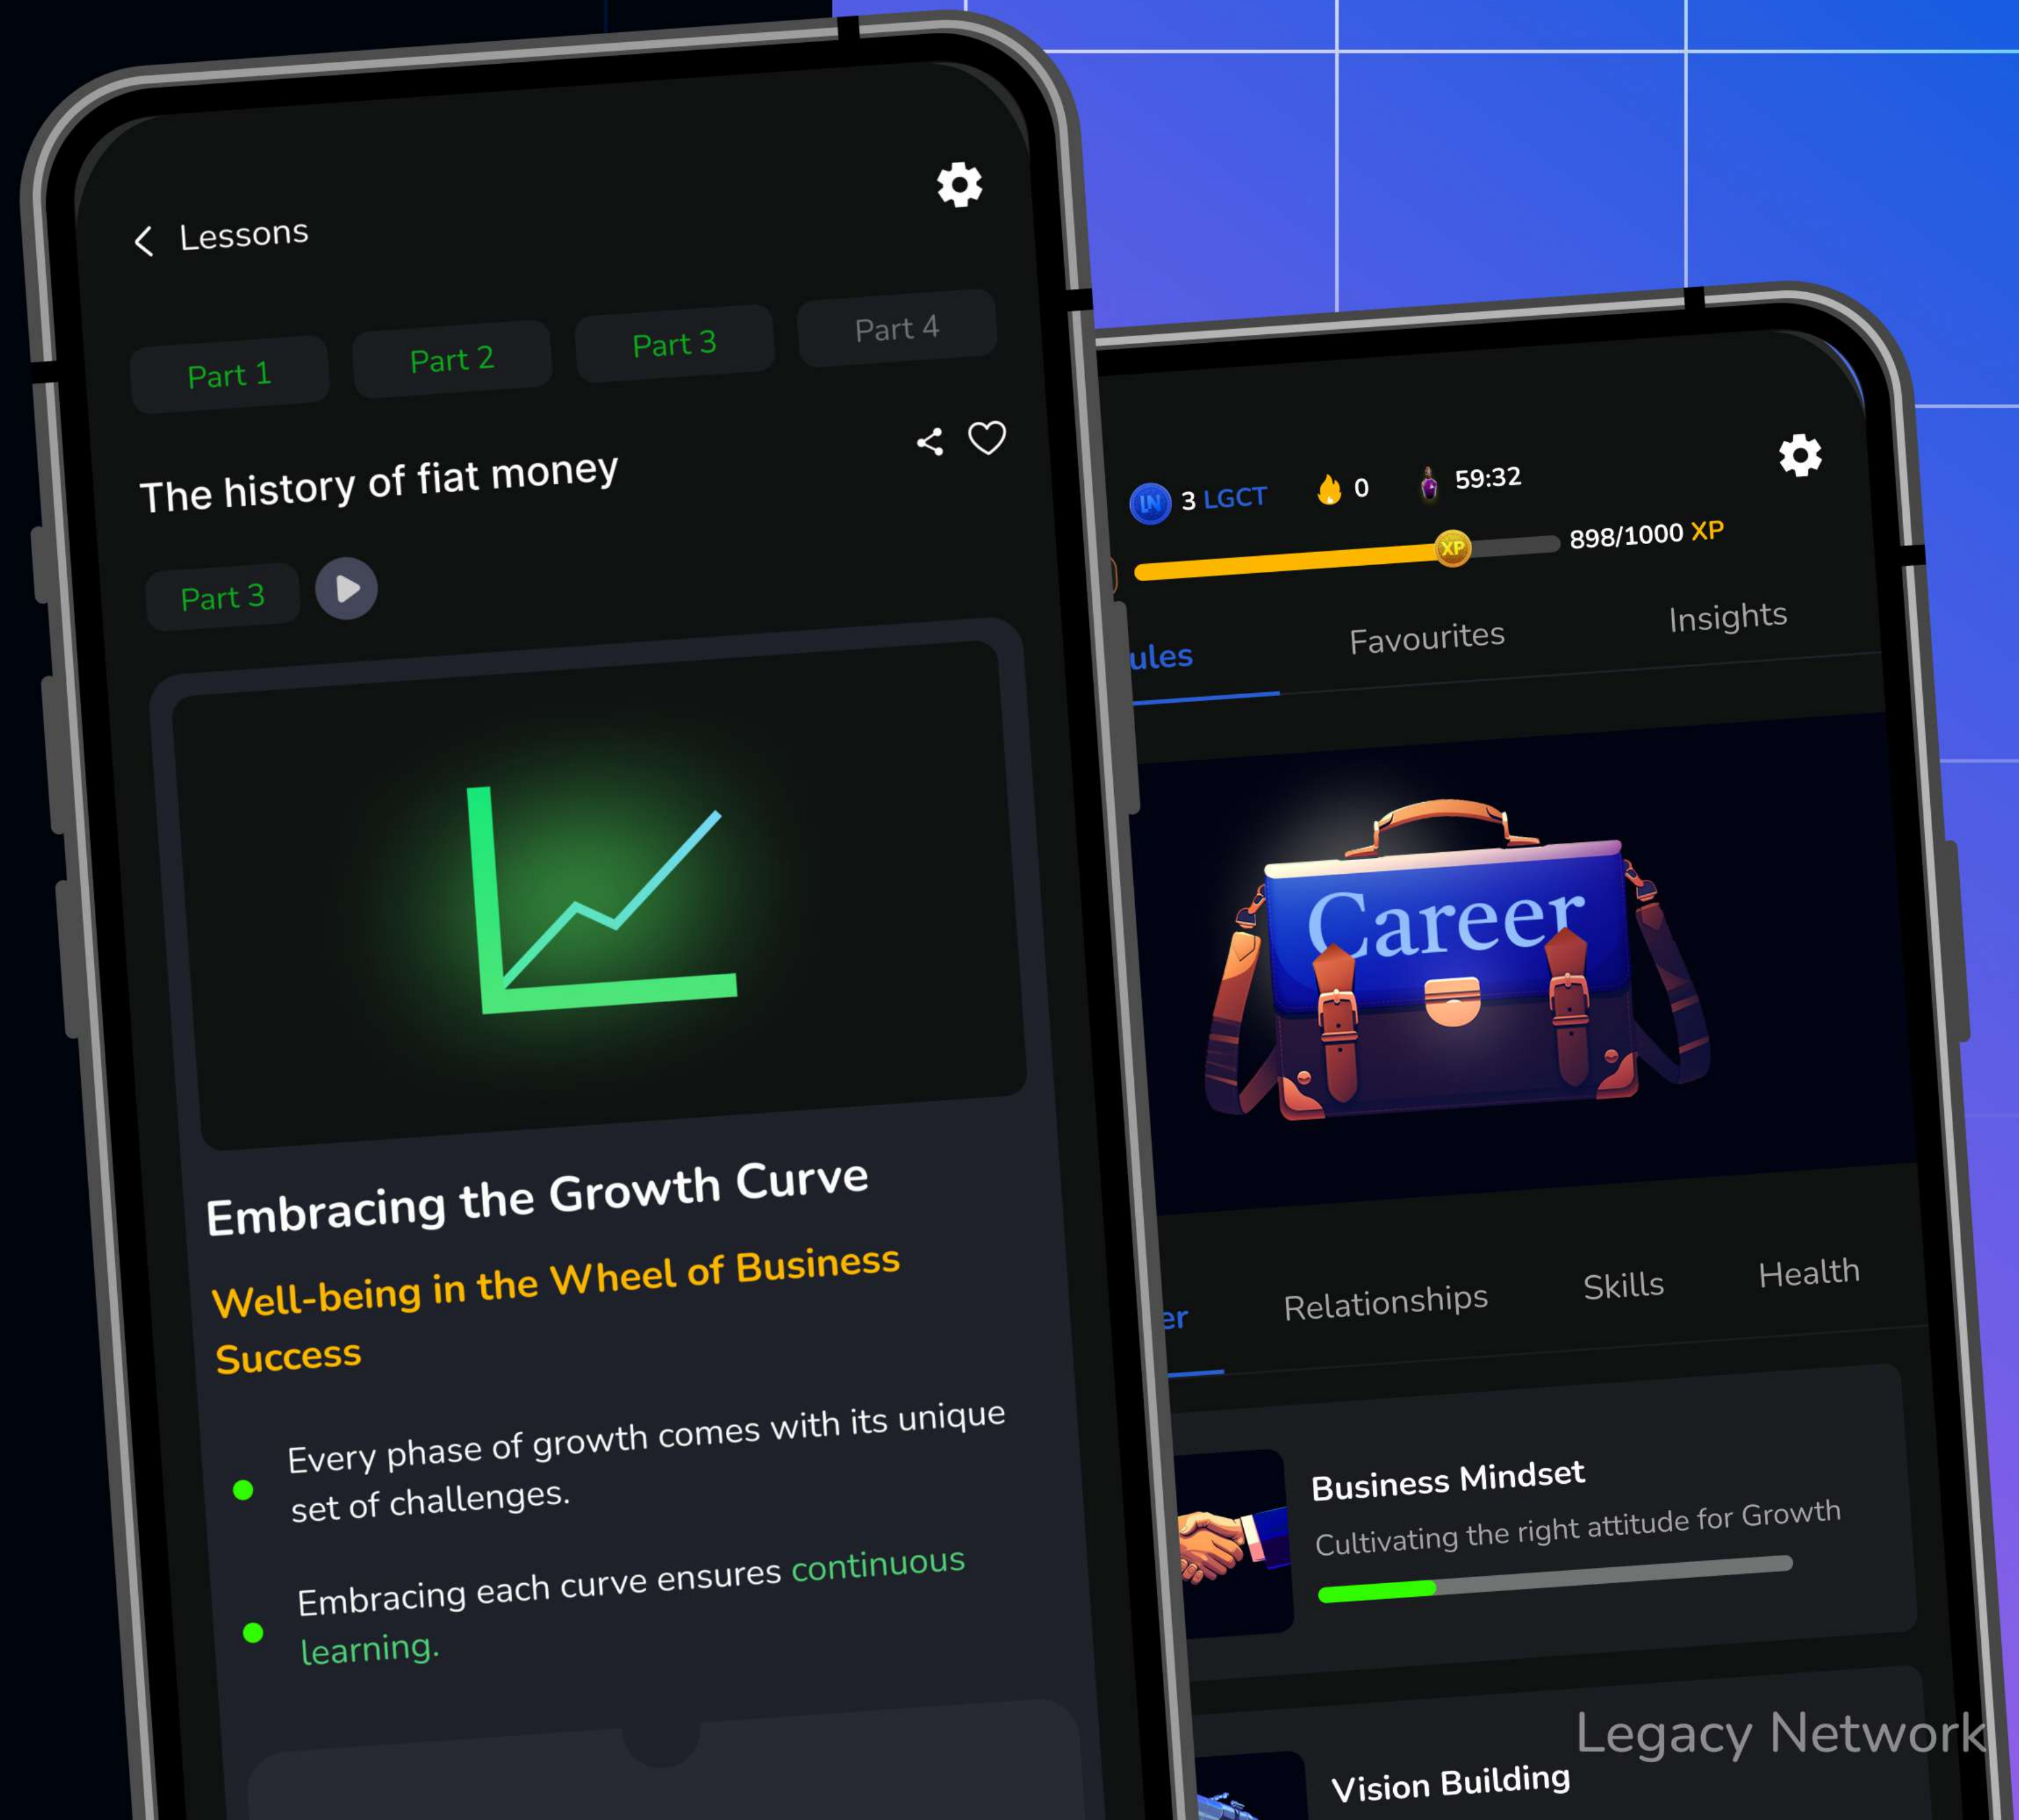

Legacy Wallet

Our non-custodial wallet allows users to manage their favorite cryptos in a secure and easy way. Features include holding, sending, buying and selling tokens on multiple blockchains.

Legacy Academy

Your unfair advantage

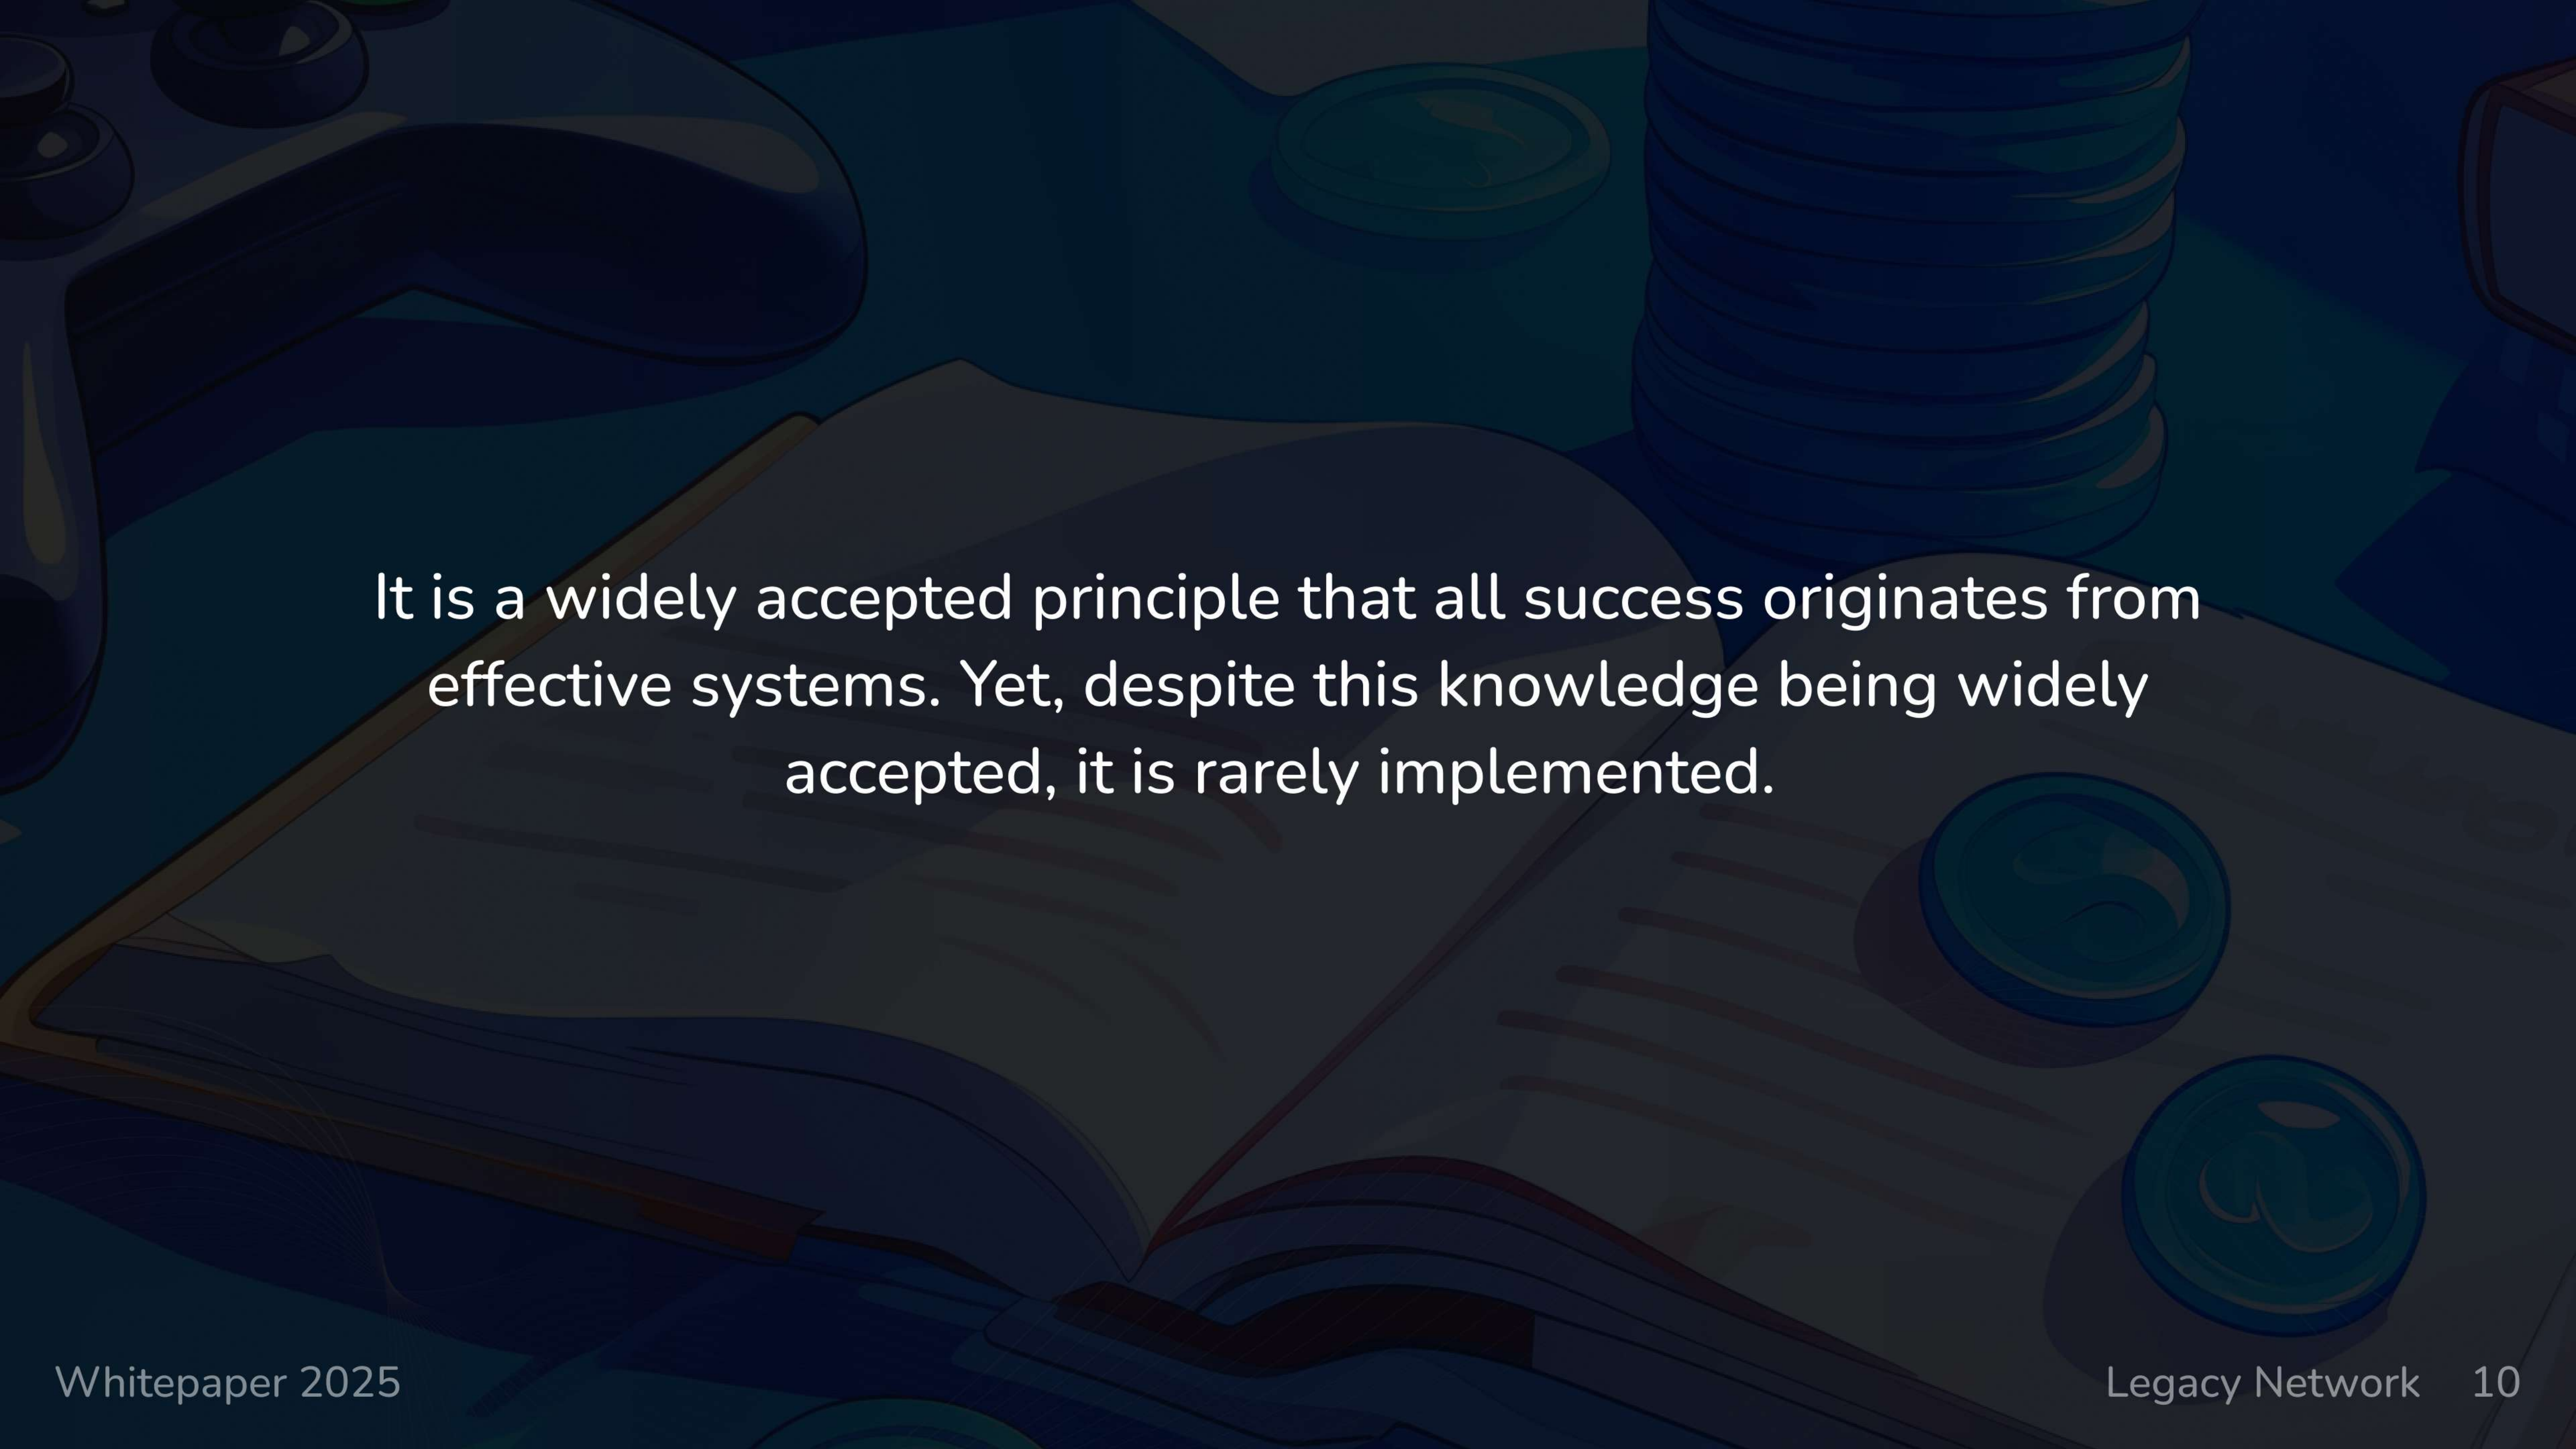

Problem

Many individuals struggle with navigating through today's challenging world, unable to reach their desired goals.

The reason for the problem described lies primarily in **the human preference for short-term rewards over long-term success**, happiness and health as a basic state.

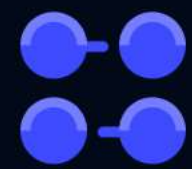

In general, today's **average person** is trapped in a **state of aimless distraction** and lacks the necessary strategies and resources to escape this state.

A dark, stylized illustration of a desk. In the upper left, a desk lamp with a curved arm is partially visible. In the center, an open book lies flat, its pages showing faint horizontal lines. To the right of the book, there are several stacks of coins. One tall stack is in the upper right, and two smaller stacks are in the lower right. The overall color palette is dark blue and teal with some highlights on the coins and the book's pages.

It is a widely accepted principle that all success originates from effective systems. Yet, despite this knowledge being widely accepted, it is rarely implemented.

This disconnect is particularly evident in education. Current systems fail to address critical needs, leaving a gap in their ability to:

Teach success-relevant topics in a manner that is both simple and guided.

Activate the brain's reward system, making the process of learning inherently engaging and enjoyable.

Design education systems as attractive as entertainment products to keep the learner's attention.

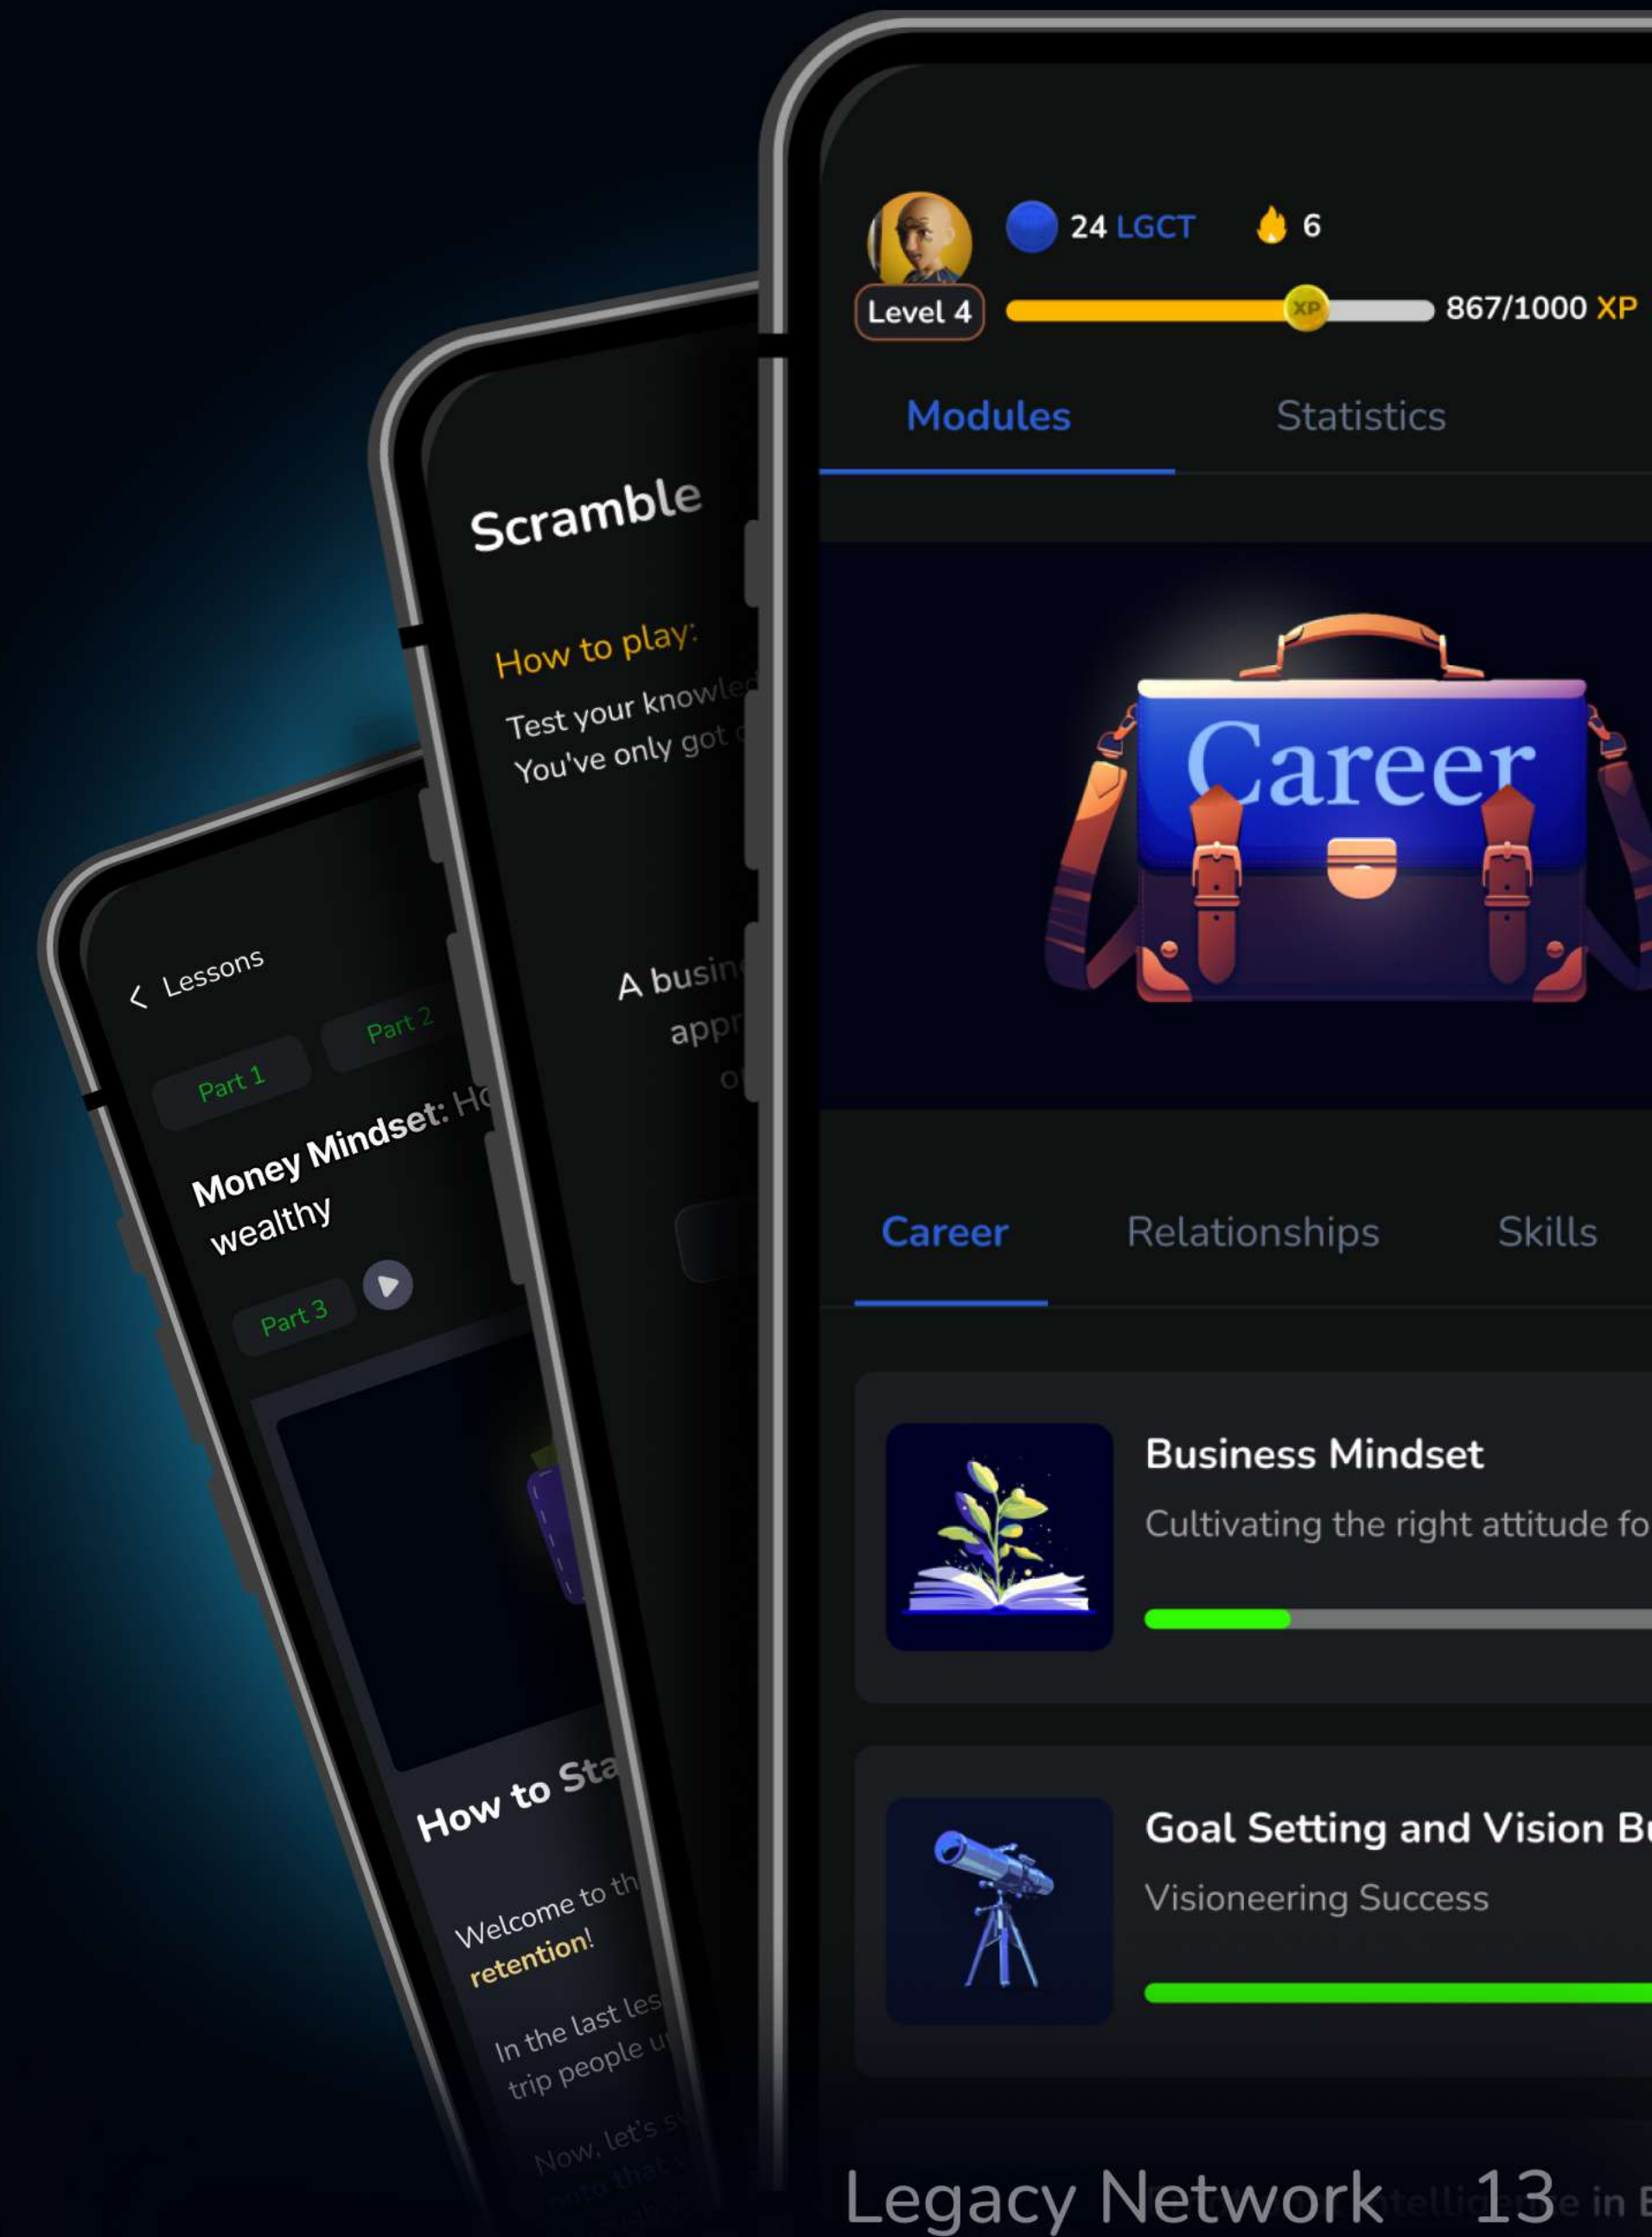

Legacy Academy is an effective solution to bridge this gap. By redefining how we engage with educational content, it transforms learning not only into a more efficient process but also in one that learners actively anticipate and enjoy.

Product Overview

The Legacy Academy is a gamified mobile learning application. It covers personal growth and success-related topics in the categories of career, relationships, skills, finance, and health.

The app helps users elevate their personal and professional lives by making learning as engaging as scrolling through social media. Built on a neuroscientific model, the Legacy Academy addresses the average person's biggest obstacle: the addiction to instant gratification, resulting in short attention spans and low discipline.

Product Features ✦ The pillars

Legacy Academy is designed on the following three pillars to deliver the best learning experience in the market:

Education

With the Legacy Academy , users build the knowledge they need to **improve** their daily lives. The content is delivered in the form of **short modules** followed various game-elements.

Network

Users join a community of like-minded people that share a common goal of becoming the best version of themselves.

Guidance

Legacy Academy provides a structured journey where the user is guided through AI to achieve his set objectives.

Learn through Modules

Structured Education

Select a Module

Users choose between various expertly-crafted modules across the categories career, relationships, health, skills, and finance. Each module is **structured** in order to provide a chronological flow. This allows users to build their knowledge **step-by-step** and create a **strong base** for their future development.

Play Through a Lesson

Within each module, the content is broken down into visual short-lessons. A lesson covers a specific concept and contains a text, a visual element, and a practical task for users to complete.

Audio Experience

Legacy Academy offers various ways to experience learning. In addition to reading visual cards, the app also offers the possibility to listen to the modules at ones preferred pace.

Gamification

Engaging Learning

Gamification plays a pivotal role in enhancing the learning experience, making it more engaging and memorable. By integrating game-like elements into our educational framework, we not only make learning more enjoyable but also significantly boost the user's motivation and consistency.

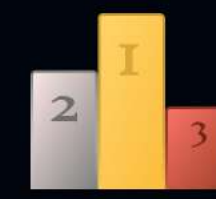

Legacy Academy leverages the power of gamification to transform the educational landscape, emphasizing the importance of interactive and socially enriched learning environments.

Rewards

Help users to build productive learning habits and stay on track with their set goals.

Leaderboards

Foster a healthy sense of competition and community among users, motivating them to invest more time and engage more deeply with the content.

Level System

Allows users to track their progress and strive for higher levels of mastery.

Quests

Challenge users with specific tasks or learning objectives, adding a narrative-driven structure to educational goals.

Game Modes & Items

Multiple game modes and items enrichen the learning experience by activating the reward system in the user's brain. This results in higher motivation and retention of the consumed content.

In-App Collectibles

Offer a personalized recognition of achievements, allowing users to showcase their progress within the community.

Continuous innovation ensures the introduction of new gamification strategies to keep the learning environment dynamic and captivating.

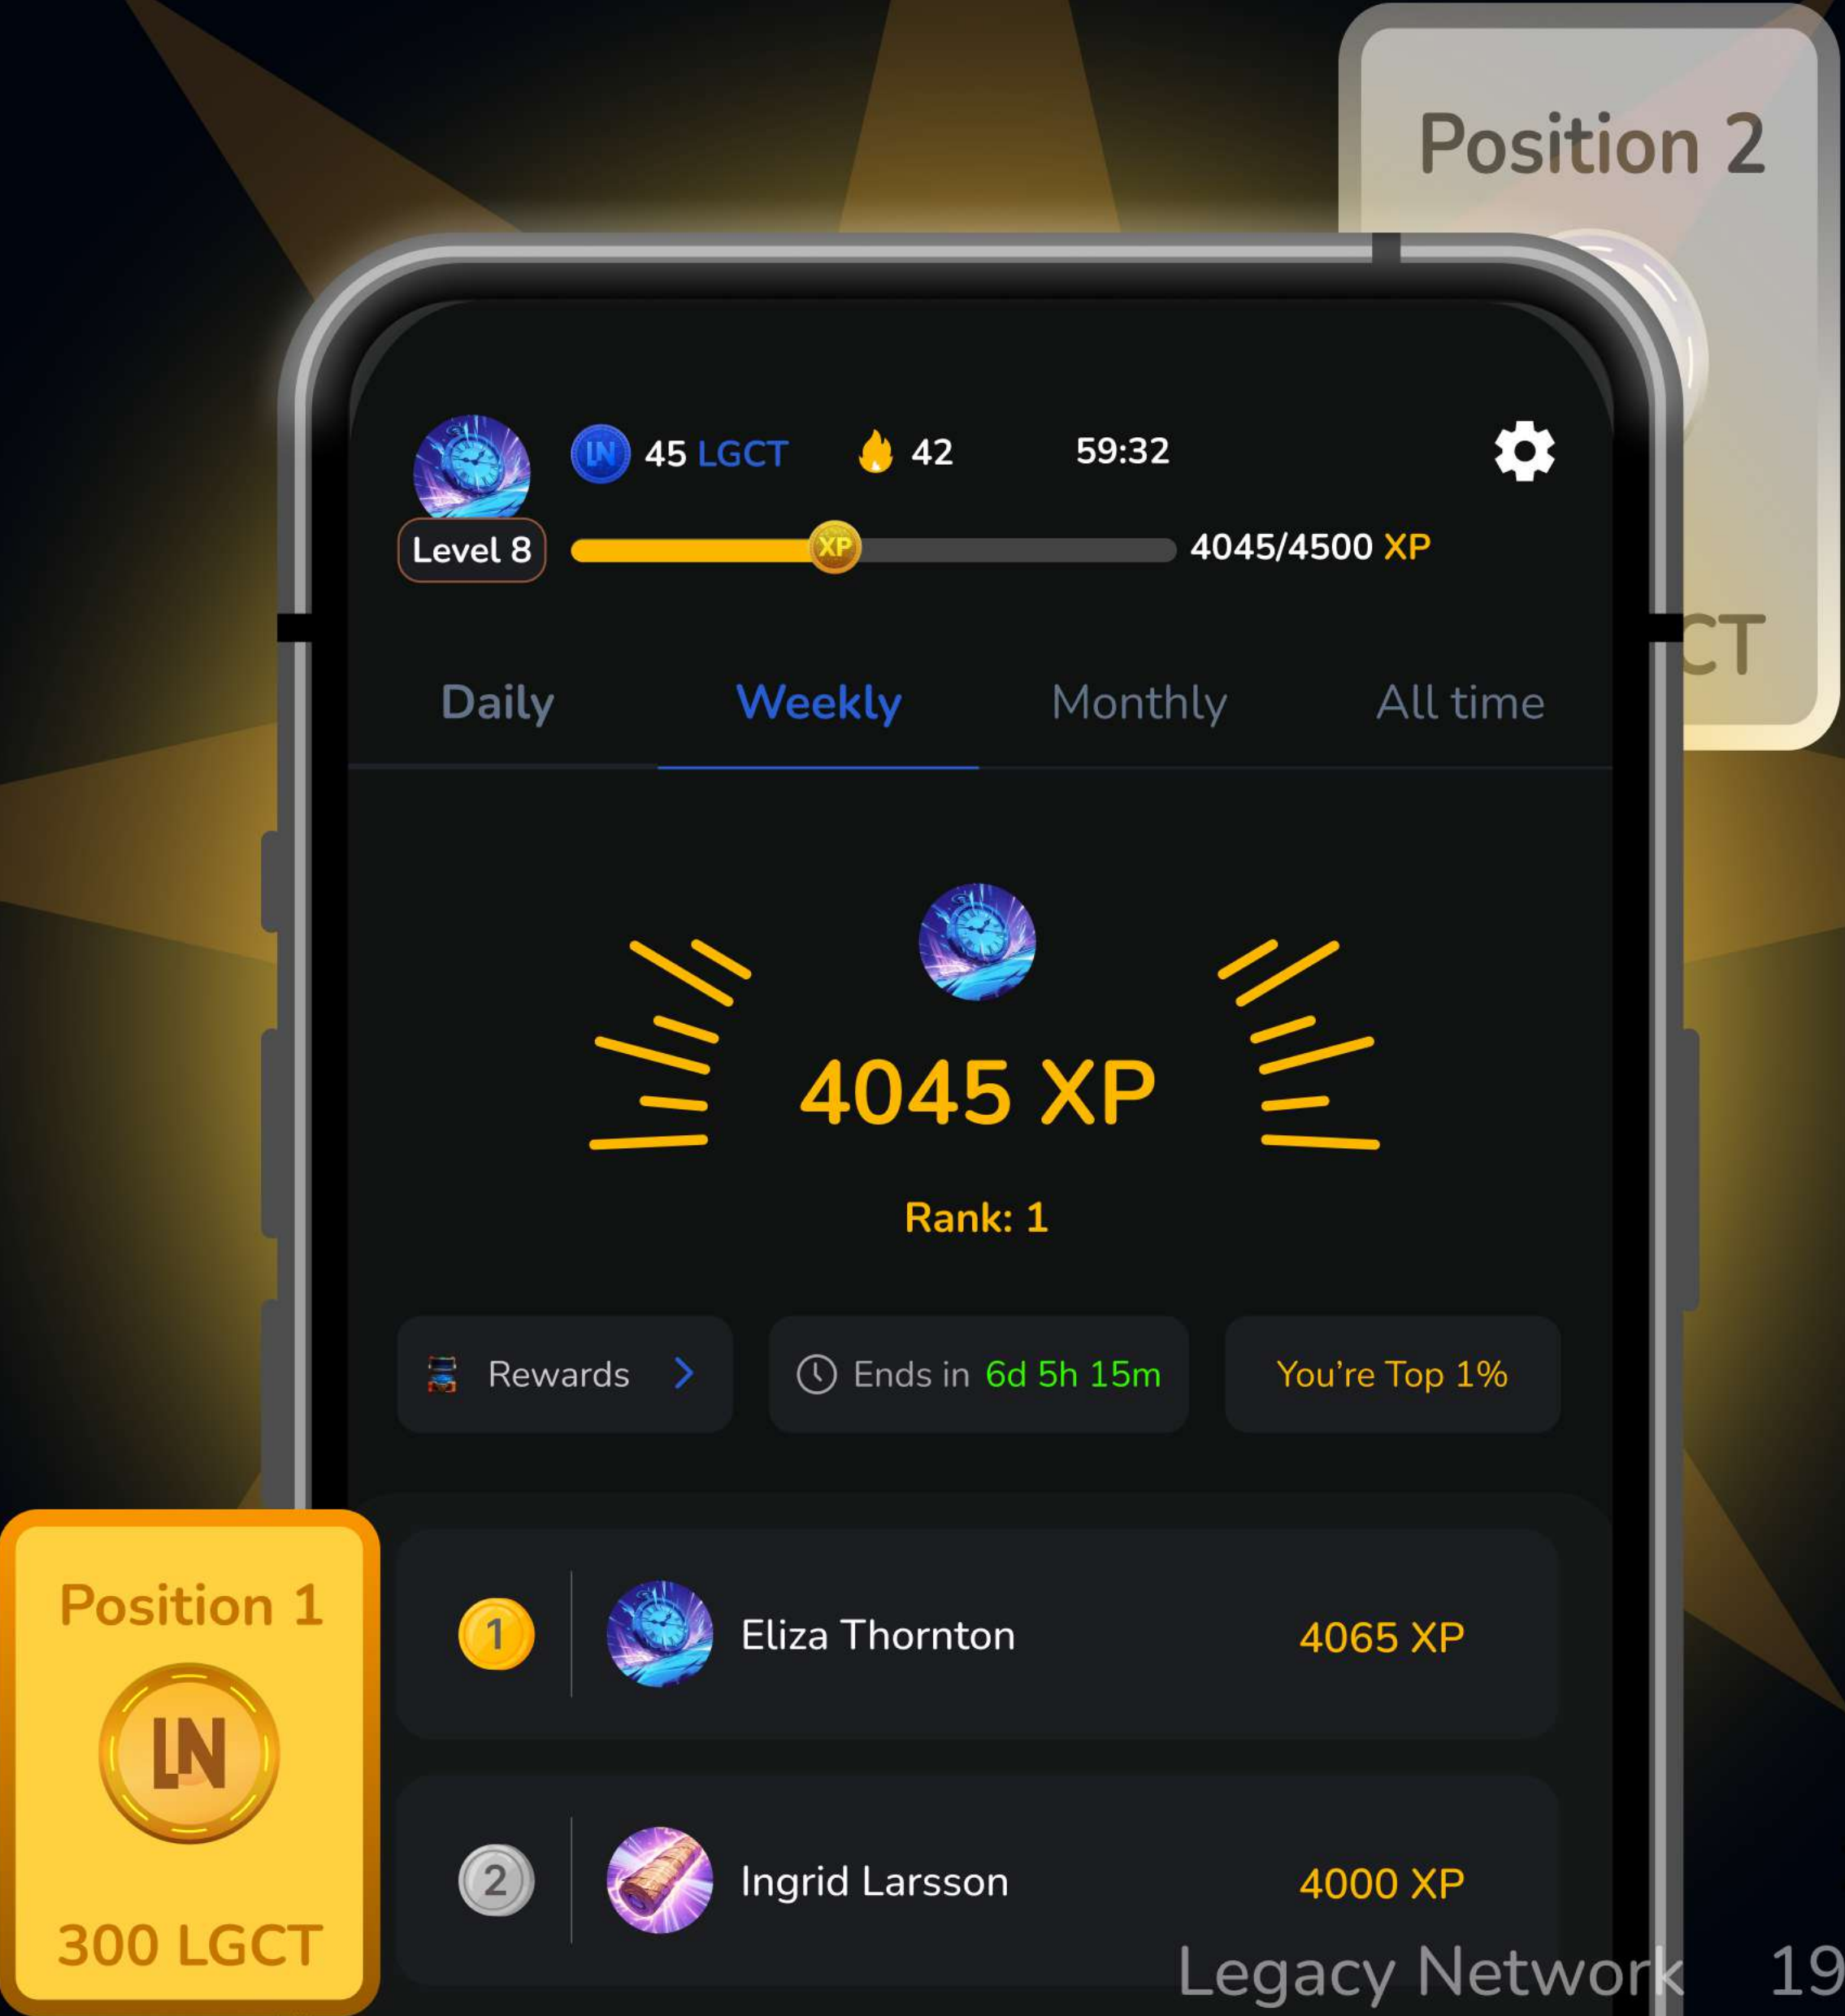

Rewards and Recognition

Each module within the Legacy Academy rewards users with LGCT, the native token of the Legacy Network ecosystem, correlating the reward magnitude with the user's performance on quizzes and challenges. This does not only incentivize users to actively engage with the educational material but also to thoroughly understand and retain it.

Leaderboards and Social Learning

At the heart of our vision is the belief that learning should be both fun and social. We champion social learning as an emerging trend, especially among younger generations, recognizing its potential to drive platform growth. The incorporation of leaderboards and community features highlight our commitment to this vision, encouraging users to bring friends onboard and collectively work towards their goals.

Daily Tasks

Guided Journey

Each module ends with a **practical task**.

The objective is to **Turn theoretical insights into practical steps** / actionable items

Users are encouraged to keep a journal which they will use to write down their different experiences.

Identification is the first step towards solving a problem.

Artificial Intelligence

For the User

Our artificial intelligence evaluates the collected information about the user and utilizes it to deliver individual strategies. Over time, the AI turns into a personal coach which knows more about the user, than they know about themselves.

It will be able to find errors in a person's behavior, thinking and habits which lead to failure in key areas of life. By systematically adjusting these things, the user will experience a great improvement in his personal success.

Analyzes your personality, behavior patterns and much more

Grants you access to valuable data about yourself

Delivers individual strategies for your personal success

Guides you step by step through the Game of Life

Value Proposition

Legacy Tokens (LGCT)

AI Support

The AI serves as a coach throughout the learning journey.

Community Driven

Social Elements for users to connect.

Academy Advancement Roadmap

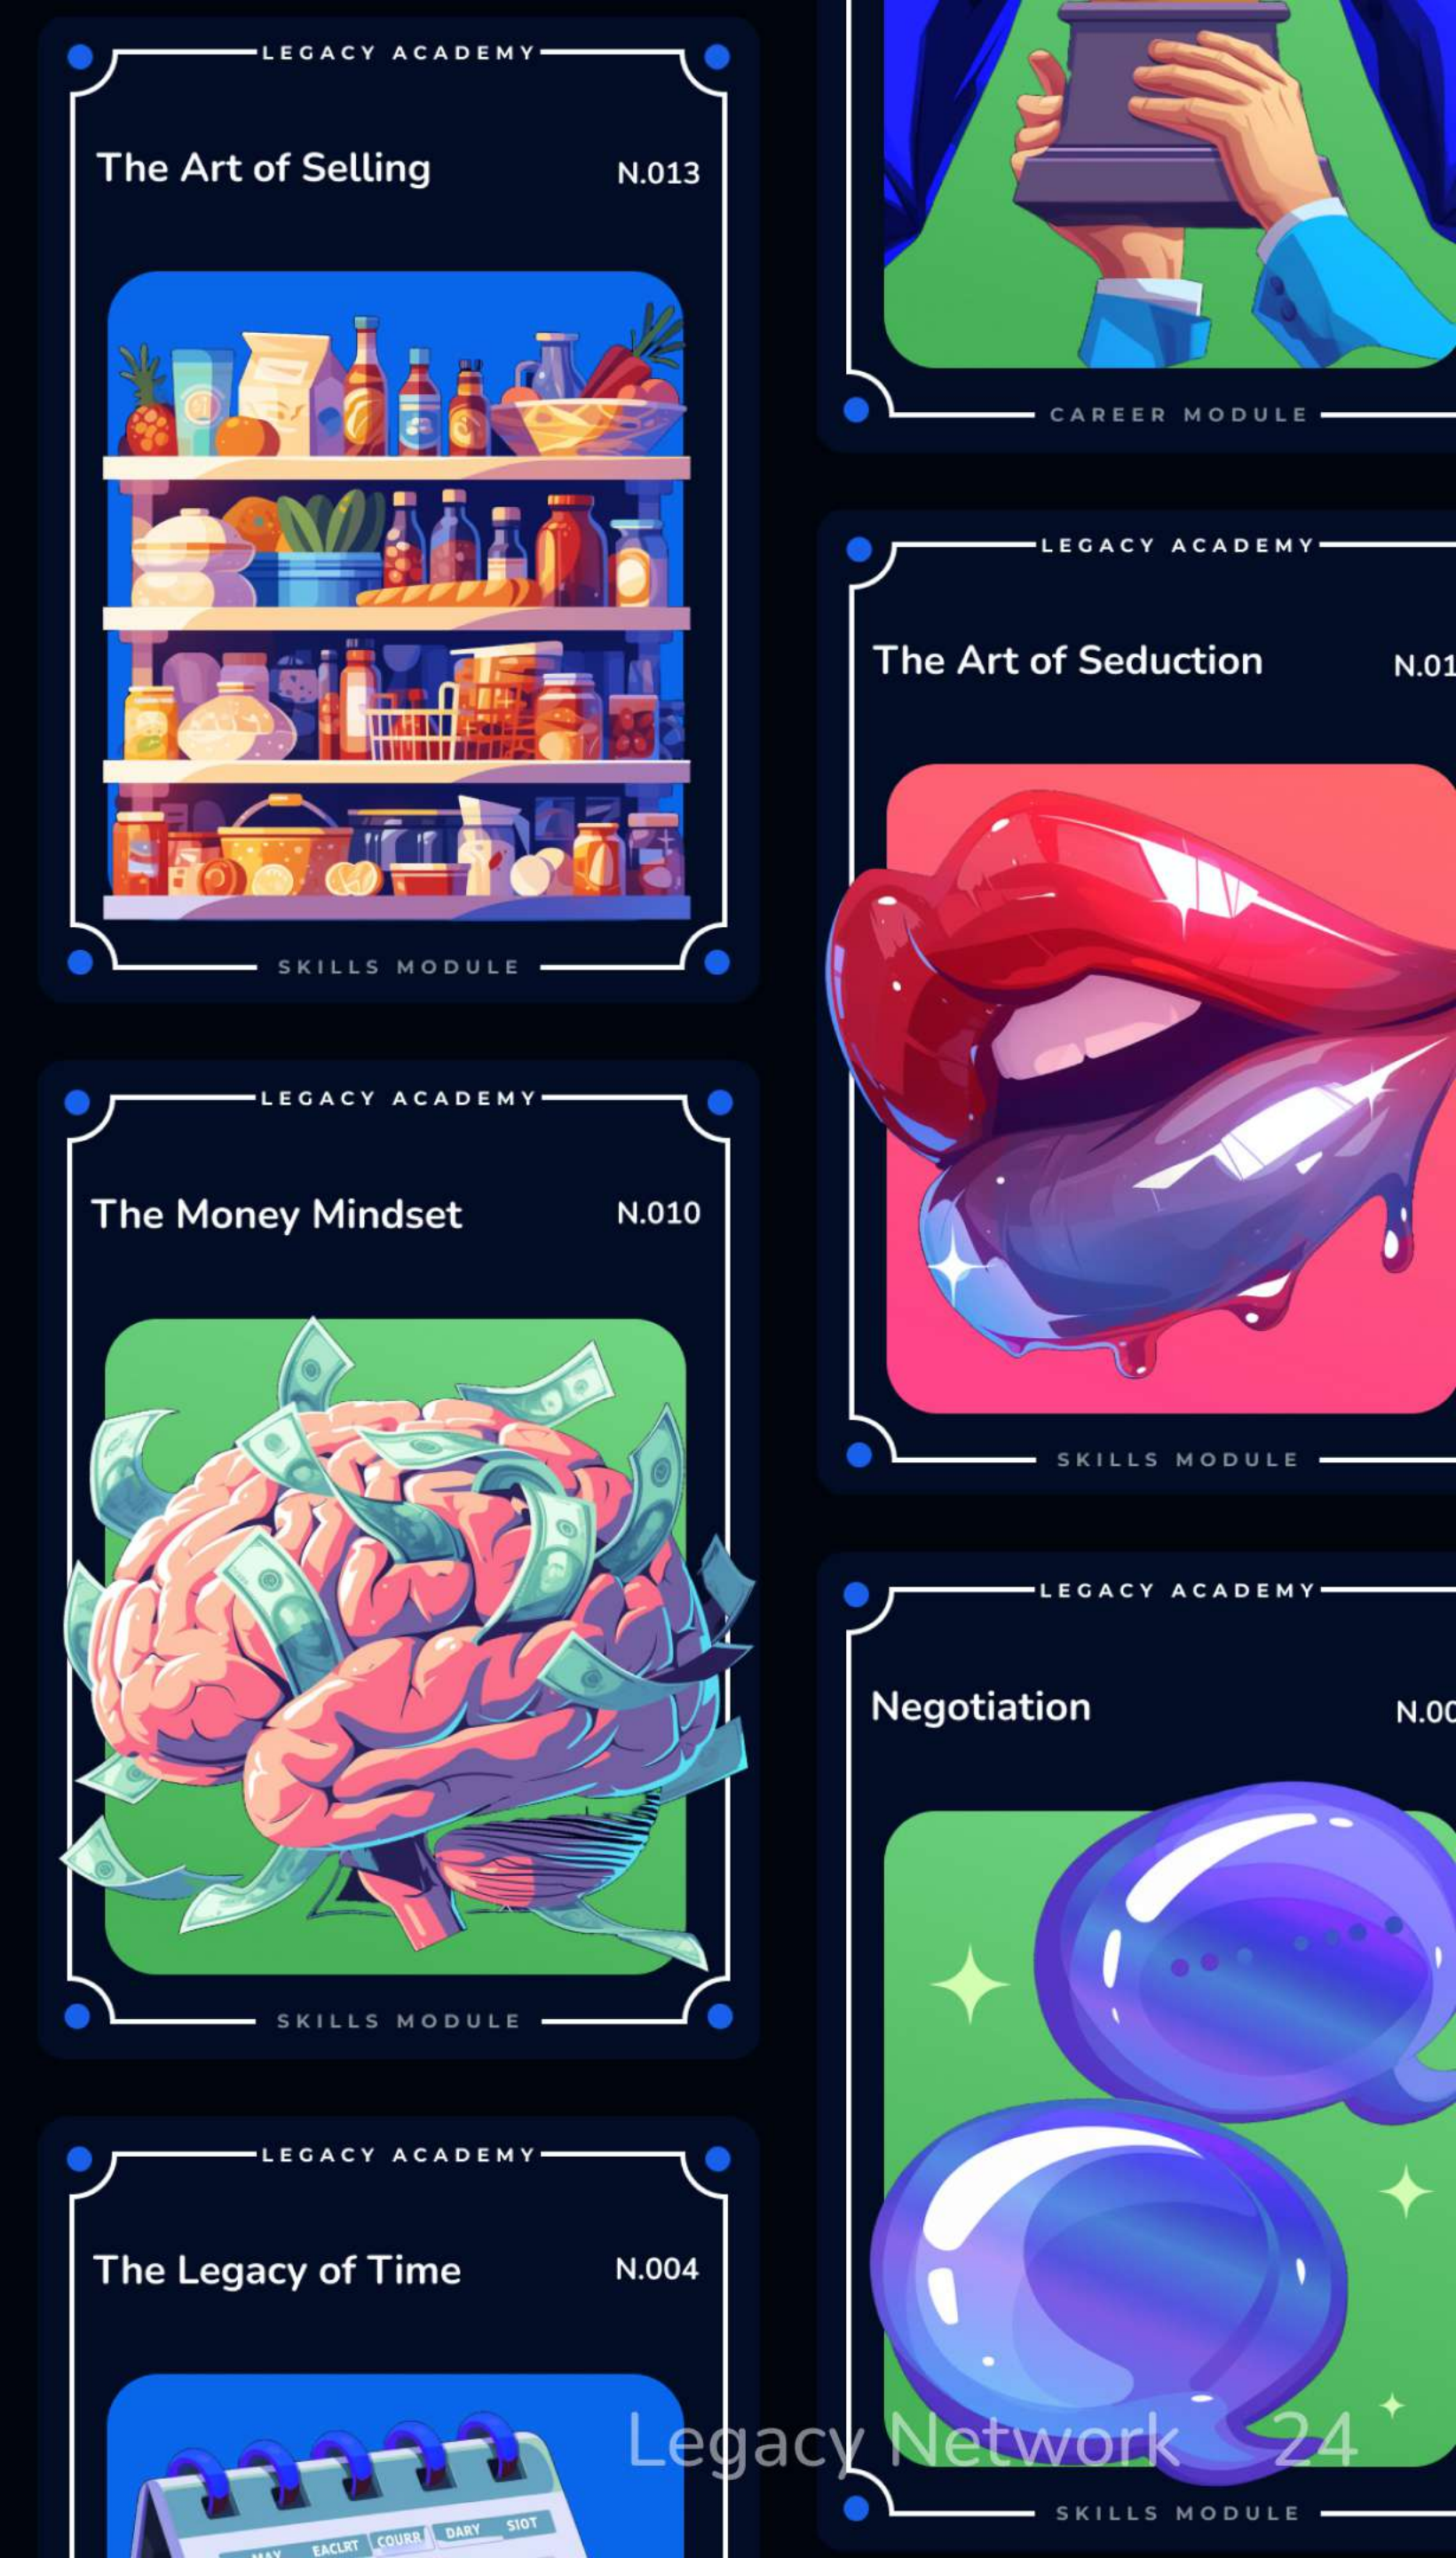

Stage One

In the initial phase, our modules cover an extensive array of topics such as business, health, relationships, finance, and skills, guiding users through a structured and interactive journey that begins with the fundamentals. As learners progress, they are rewarded with experience points (XP) and Legacy Tokens (LGCT) that have both in-app and real-life value.

To enrich the interactive learning environment, stage one introduces rewarding minigames at intervals to keep the engagement high.

Additionally, an "Insight into Action" feature allows users to practice newly acquired skills in real-world scenarios. Finalizing Stage One, users will encounter a range of new gamification elements, including a variety of functions and new items, progressively rolled out in subsequent updates. From the outset, the AI framework is an integral part of the experience, designed to learn from user interactions to enhance the learning journey continuously.

Stage Two

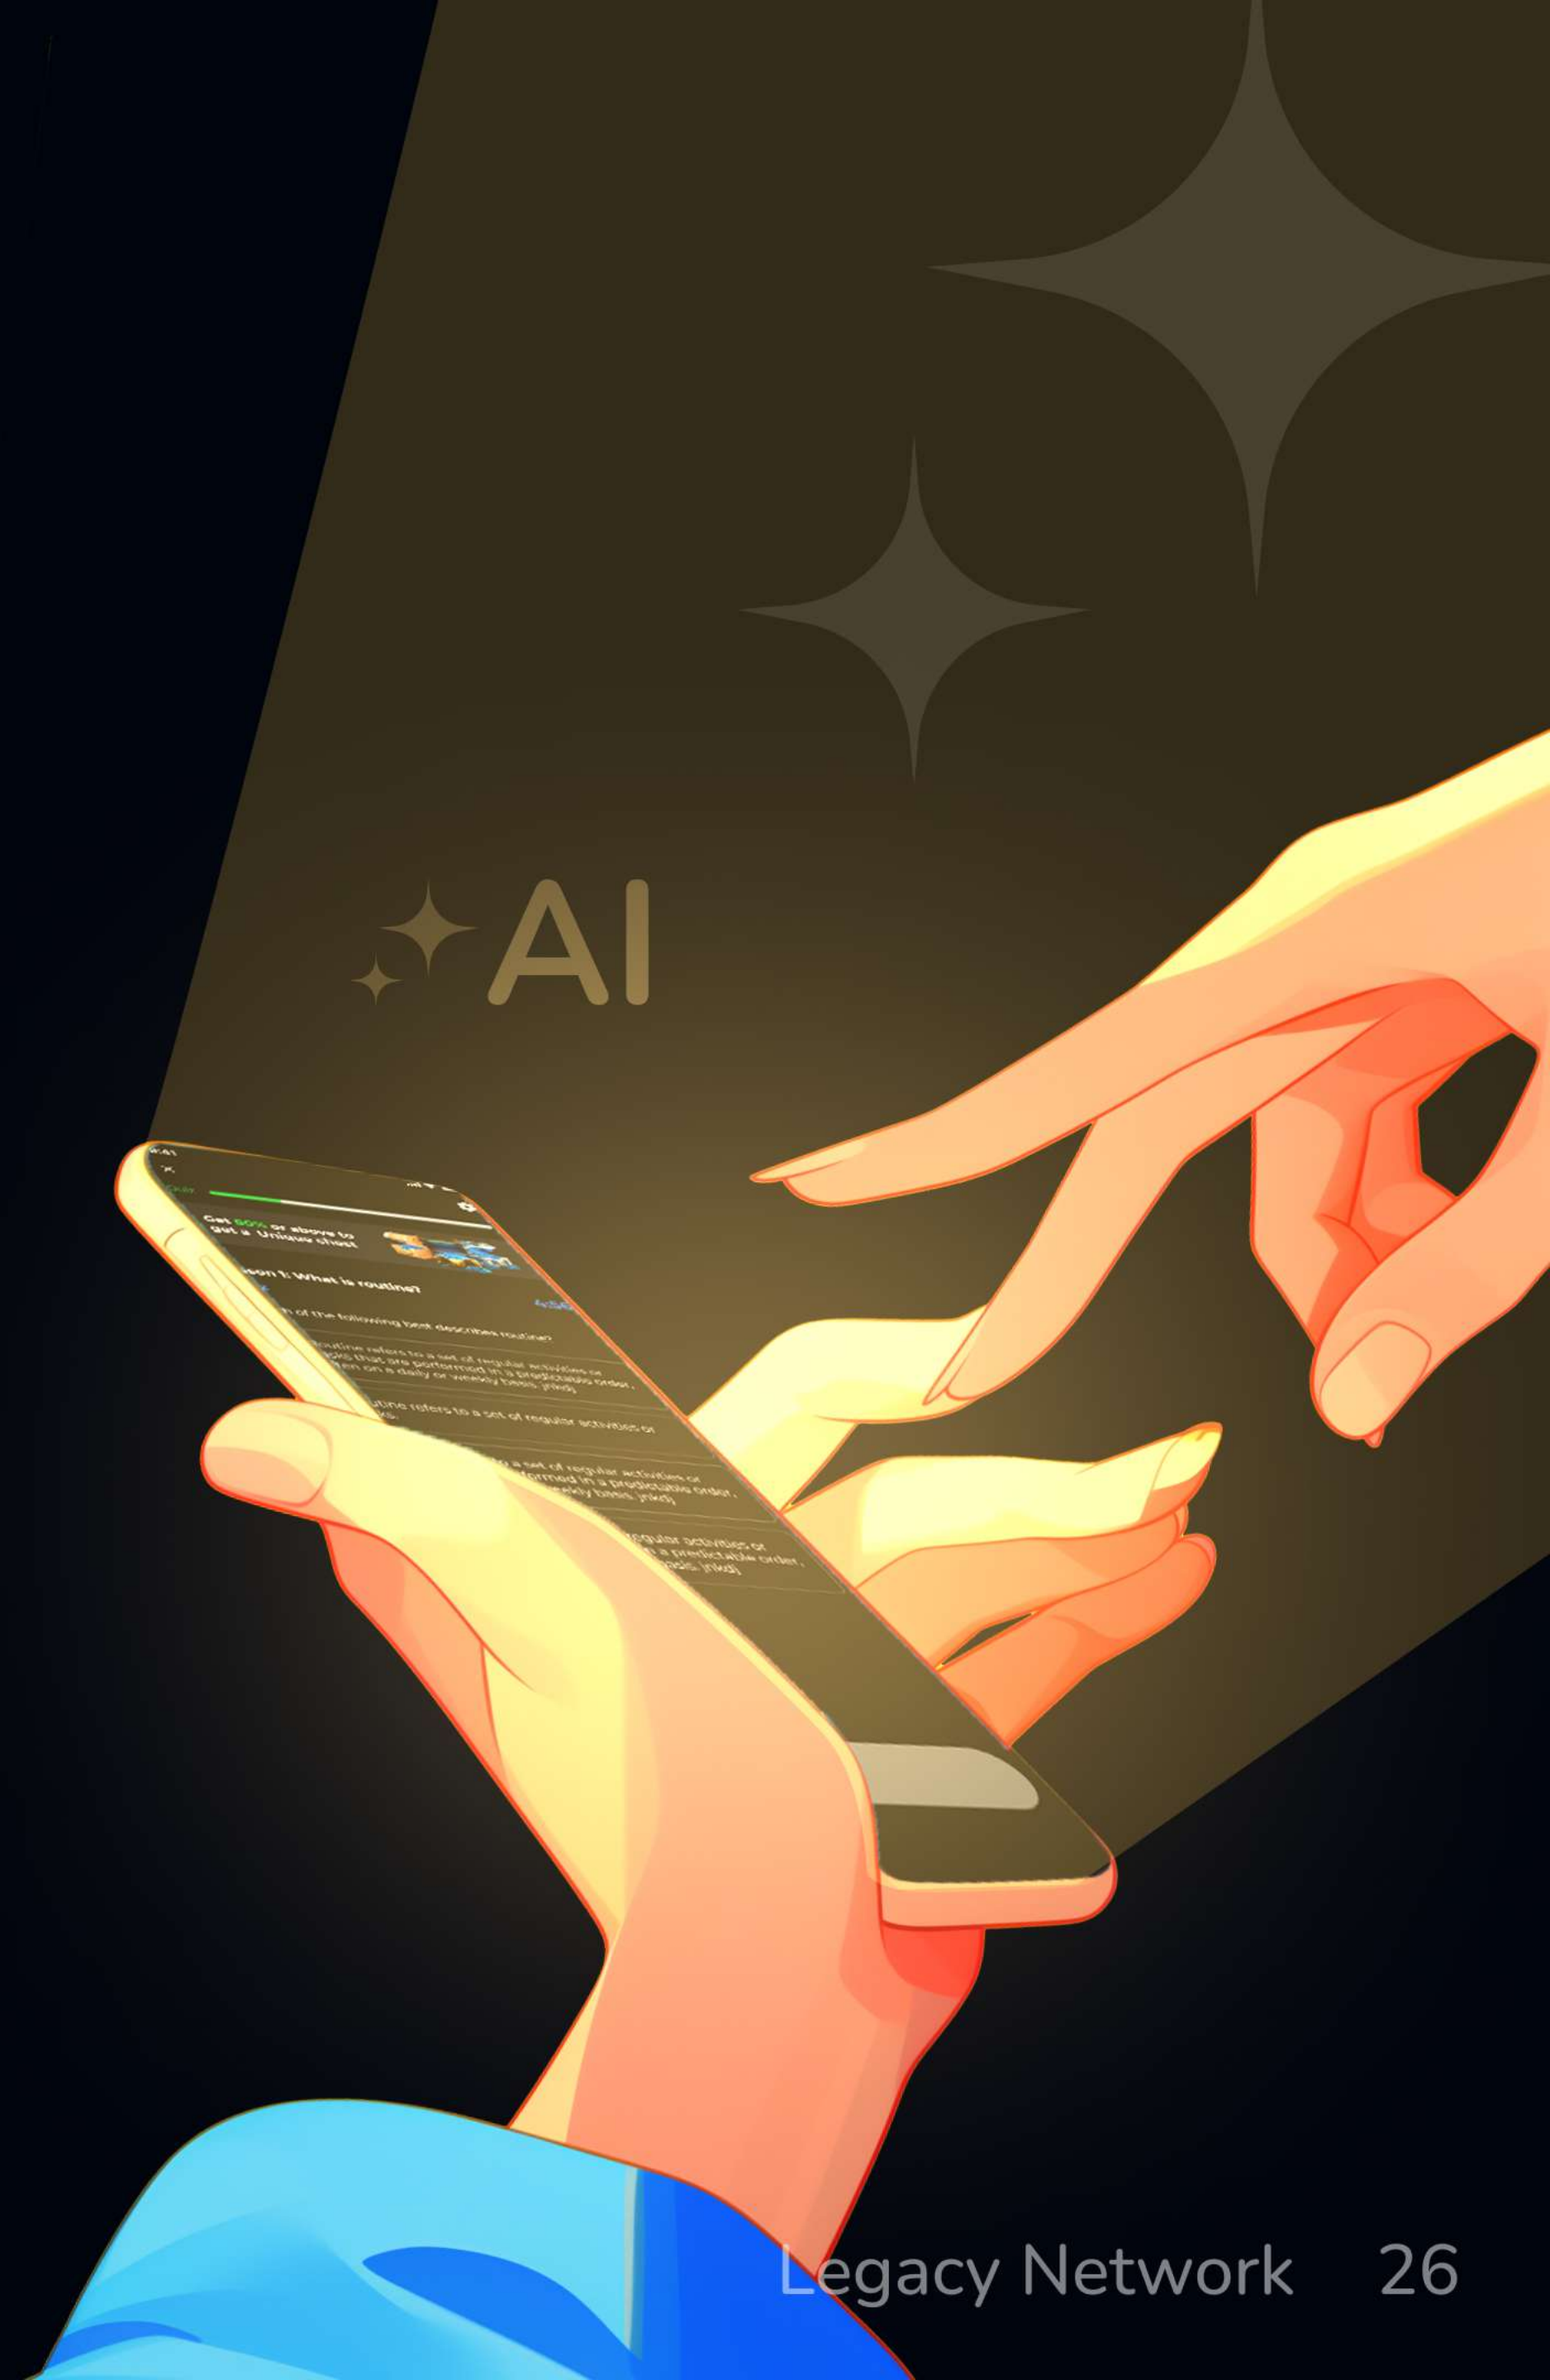

Expanding upon the foundation set in Stage One, Stage Two introduces various social-features. Users are matched based on their interests, skill-level, knowledge, and goals, facilitated by our artificial intelligence. This stage is instrumental in creating a dynamic community of learners, where knowledge and experiences are exchanged through community tasks, discussions, and mutual support, enriching the growth-process further.

Stage Three

In this phase, the application's AI transcends its initial role, evolving into a comprehensive support system across the entire platform. Rather than focusing solely on a chatbot feature, Stage Three leverages AI across all aspects of the application. This means analyzing user patterns to enhance the personalized learning journey, making the experience as impactful as possible based on insights from Stages One and Two. The AI's capacity to adapt and support ensures that users derive maximum benefit, embodying a coach and helper that enhances every aspect of the user's journey.

Each stage of the application's development represents a strategic enhancement, designed to create a more engaging, personalized, and community-oriented learning environment. Our aim is to redefine education, transforming it into an immersive, enjoyable, and impactful journey for users at every stage of their personal development.

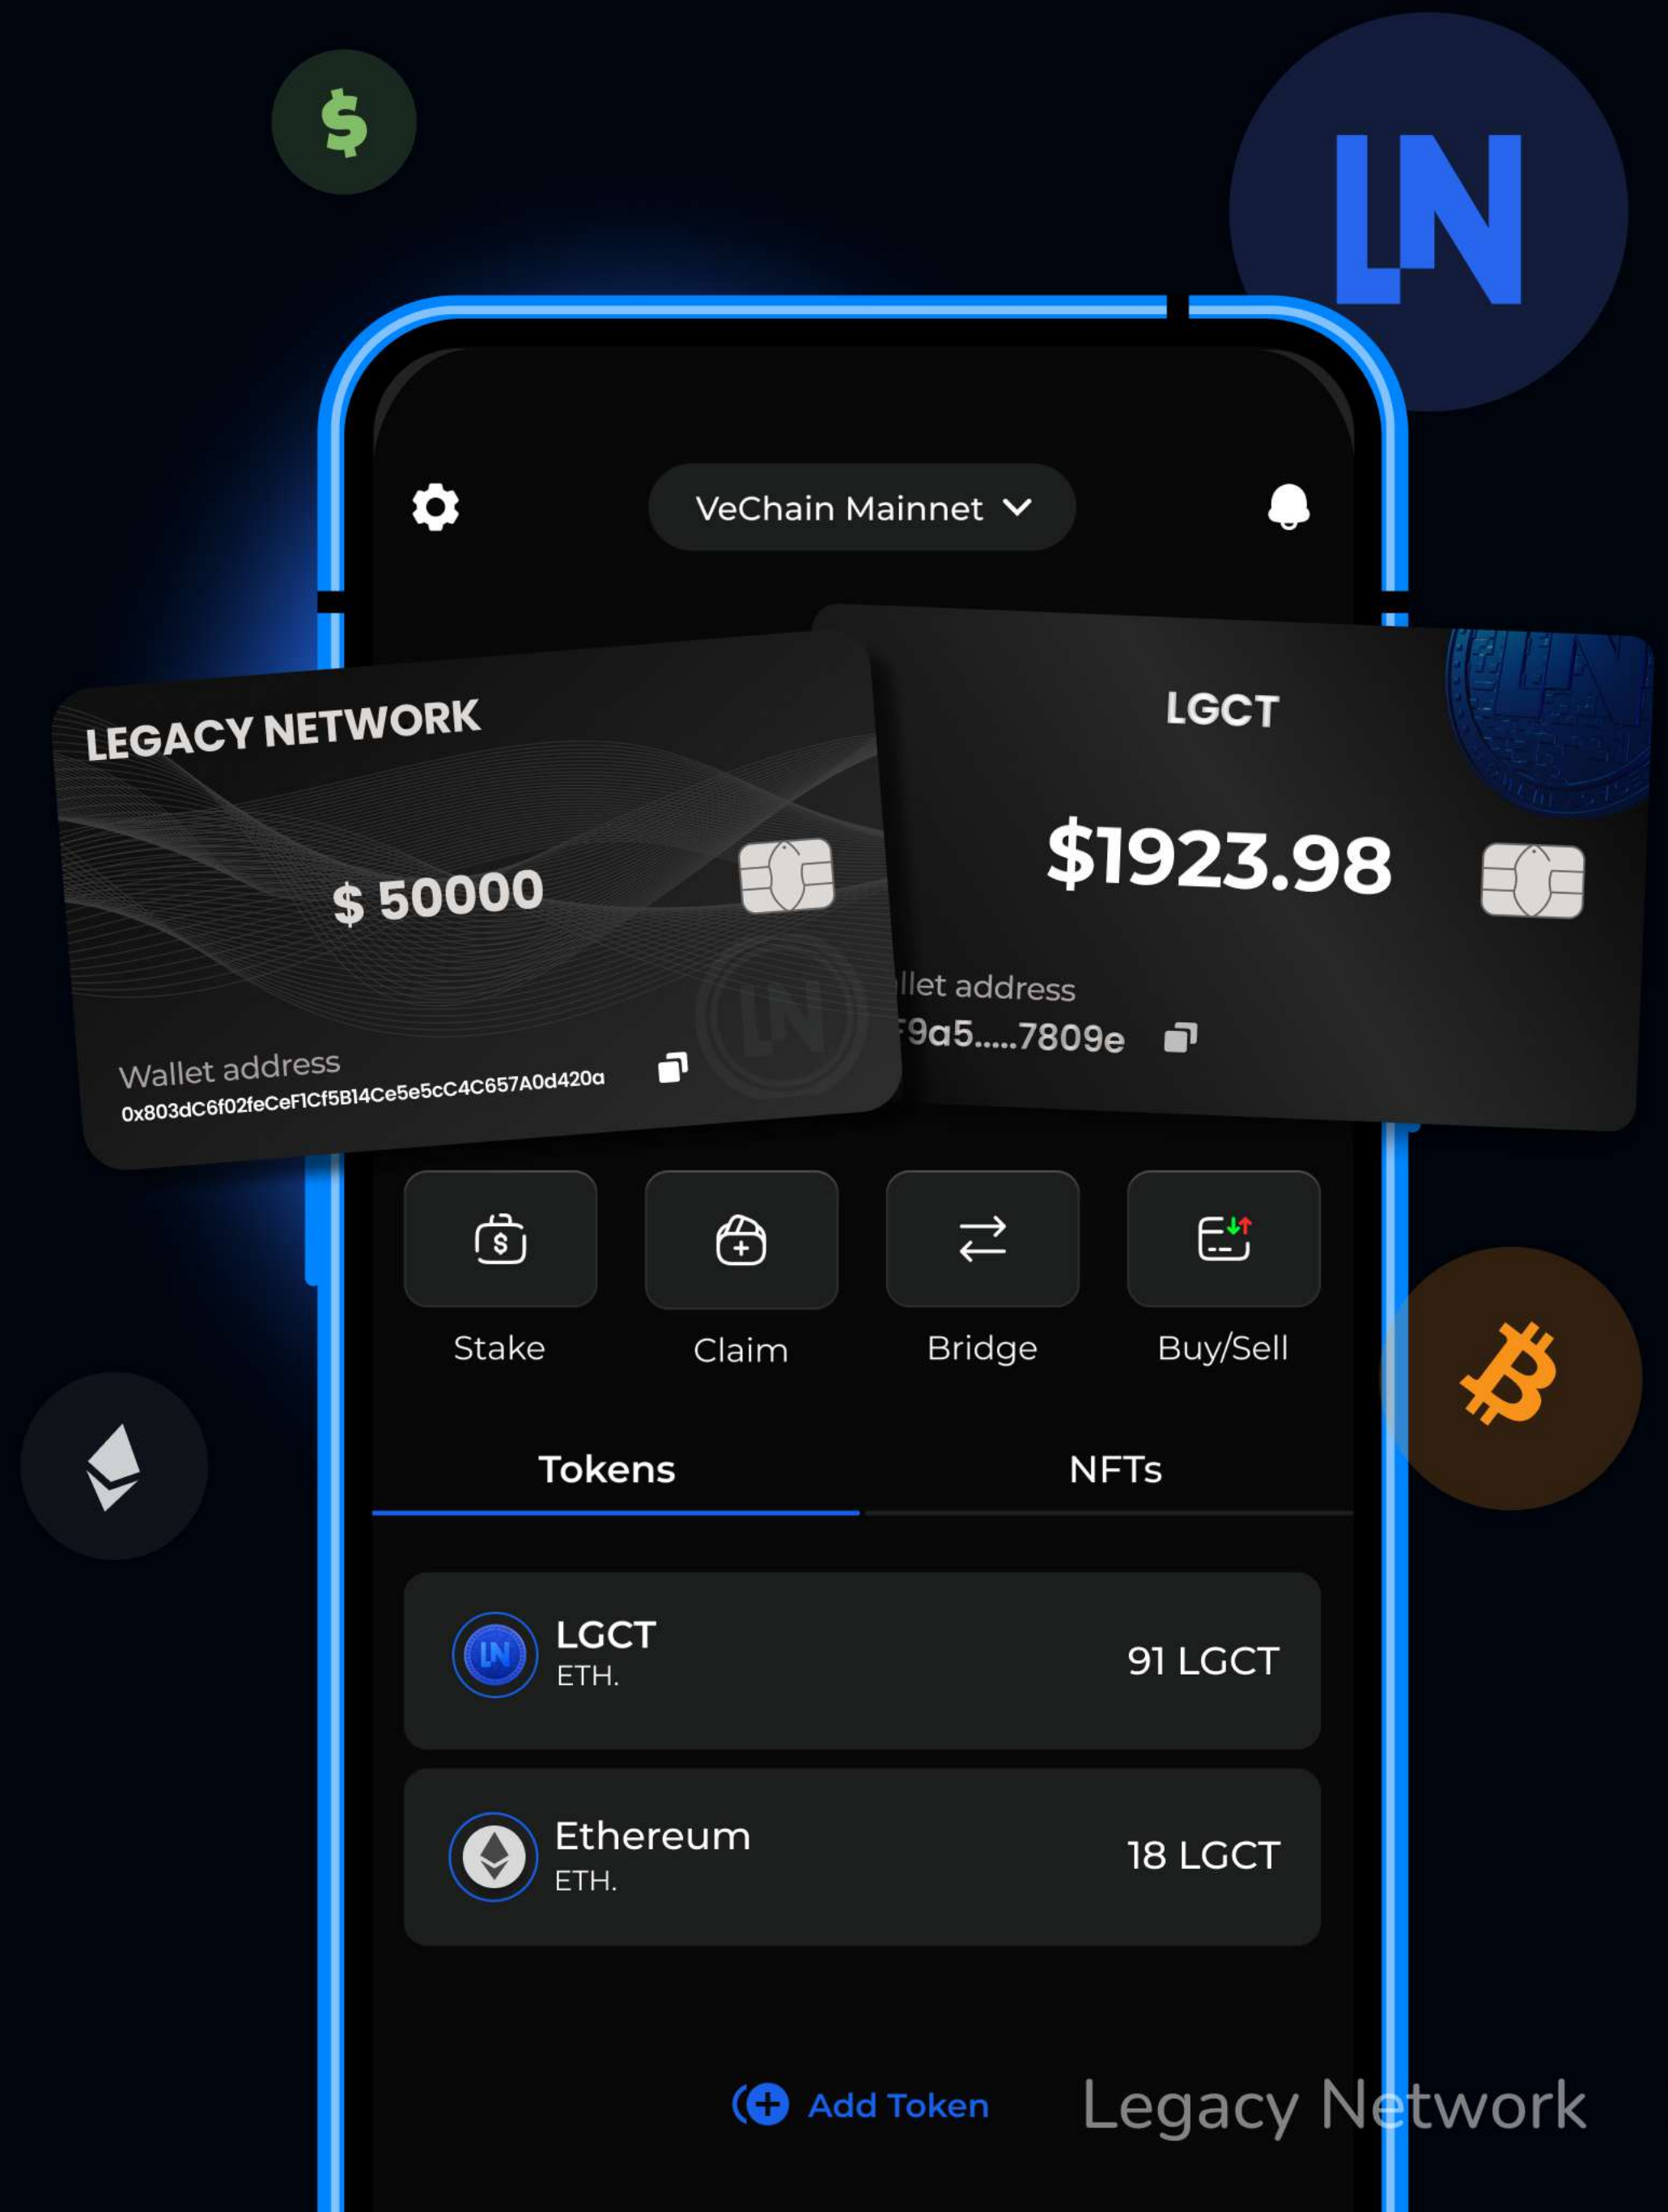

Legacy Wallet

Legacy Wallet

Our non-custodial wallet allows users to manage their favorite cryptos in a secure and easy way. Features include holding, sending and receiving tokens on multiple blockchains, browsing NFTs in one place and accessing the Web3 world via browser extension. Vested or staked tokens can be claimed in real-time directly in the wallet. Our integrated multi-chain bridge allows secure and fast token bridging between currently four supported blockchains using atomic swaps. All smart-contracts are audited for high security and performance.

Only one App for all your wallets. Don't lose the overview over all your different wallet addresses.

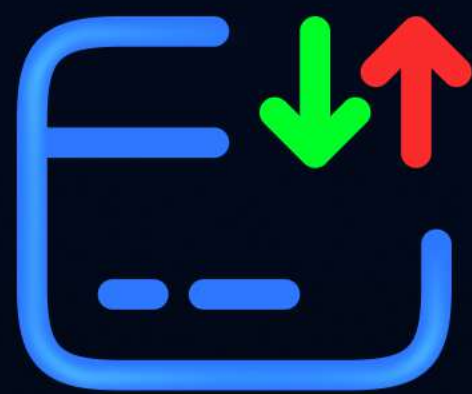

0ffee2547
a45a38856
E10F9d549

Only one wallet address for all EVM coins/tokens no matter on which blockchain.

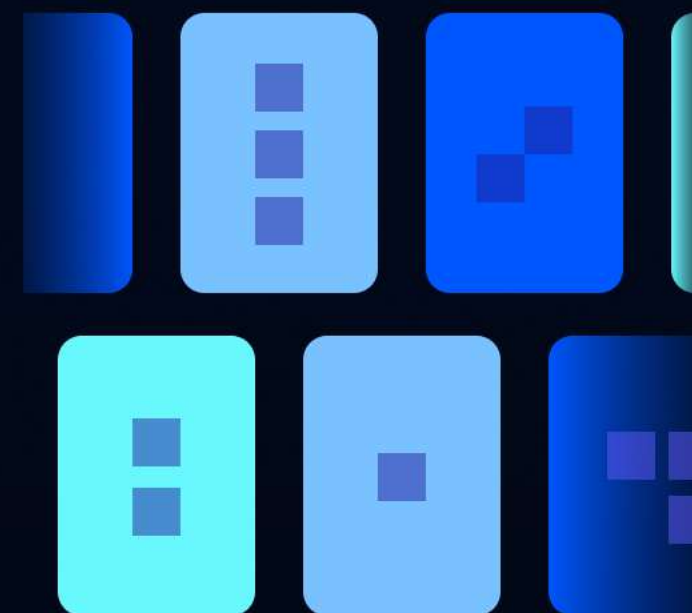

In-app multi-chain bridge for Ethereum and Binance Smart Chain

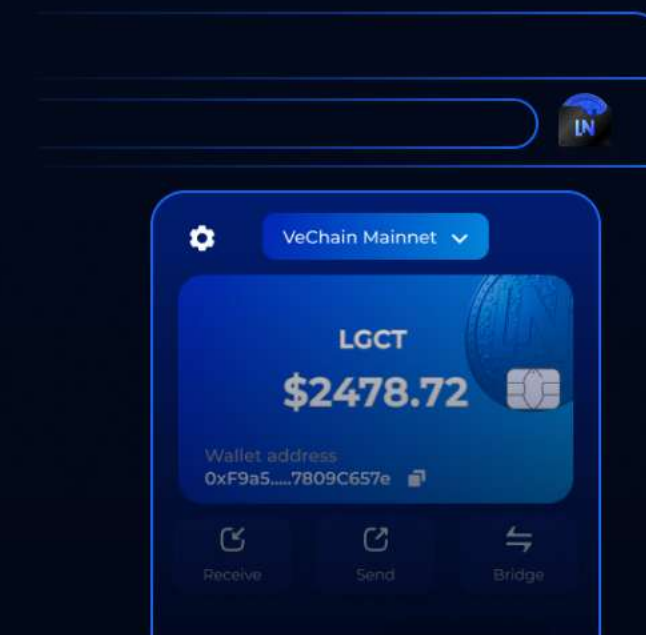

Key Features

Buy and sell different Crypto Currencies with low fees through the On / Off Ramp Feature.

NFT holding and displaying function.

Comes with its own browser extension.

Use Cases

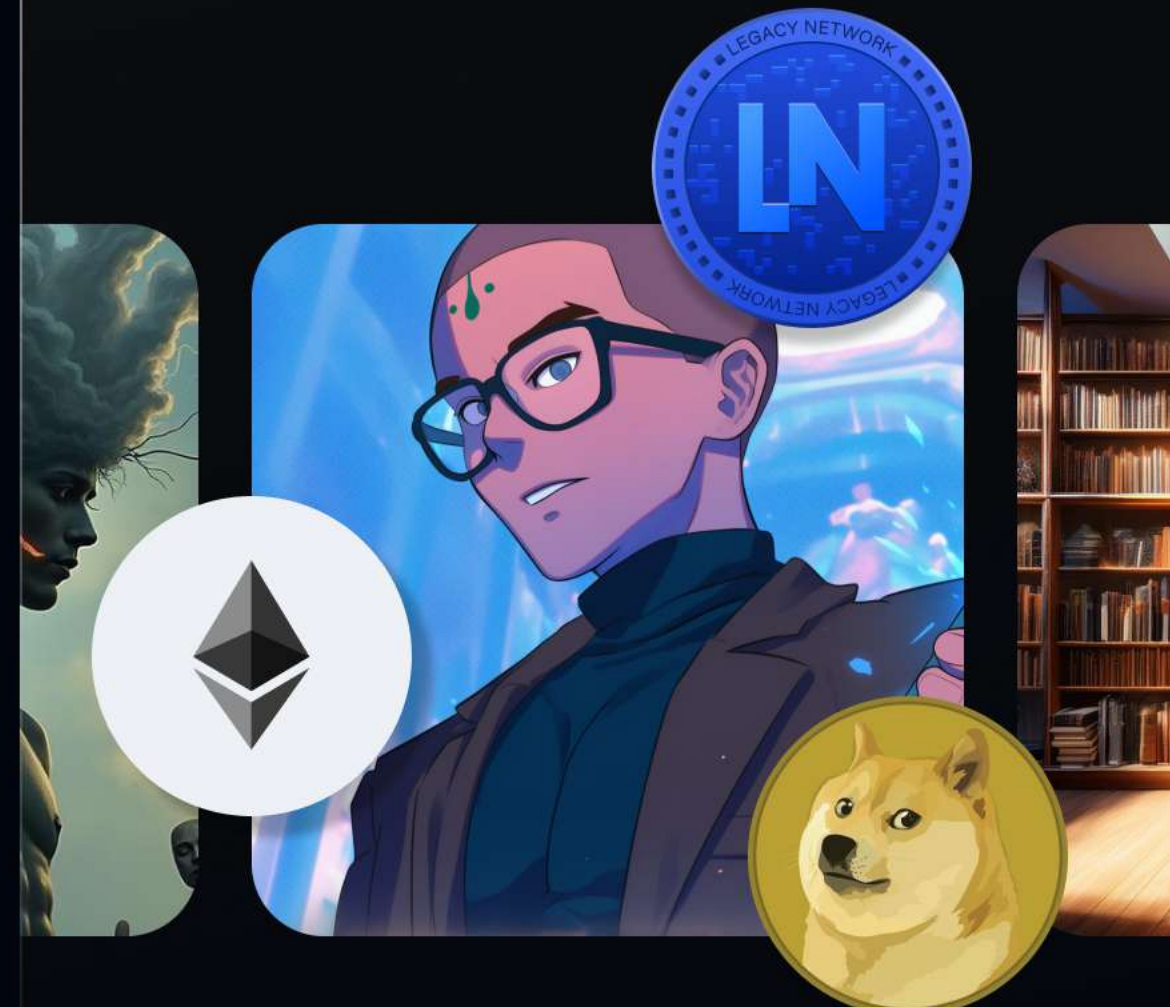

Tied to academy

Seamlessly integrated with Legacy Academy to redeem and manage \$LGCT,

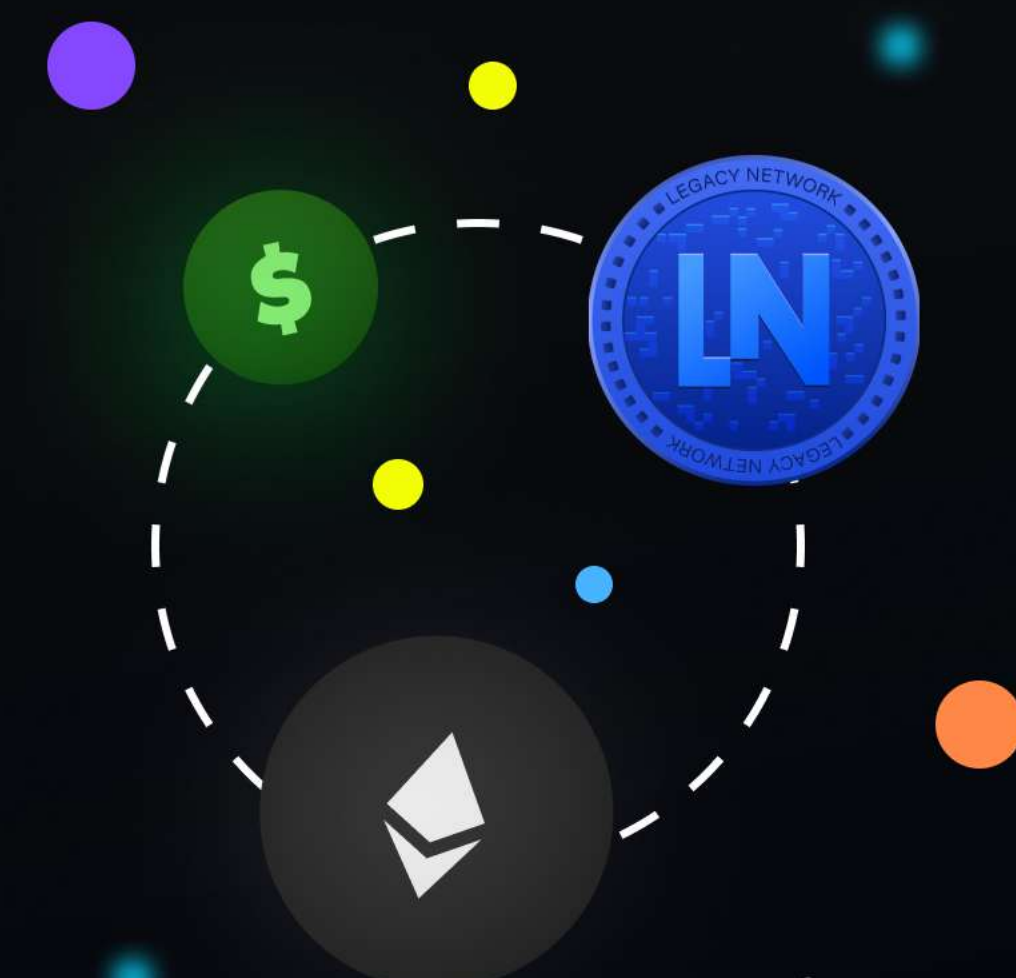

Management of your Crypto/NFTs

Efficiently manage your portfolio with intuitive tools to store, view, and organize cryptocurrencies and NFTs

Payments across chains

Enable fast and secure transactions across multiple blockchains, simplifying payments and cross-chain interactions.

Legacy Token

What is LGCT

At the core of our ecosystem is the Legacy Token (\$LGCT); a multi-chain utility and payment token. Its purpose is to enhance the user experience throughout the ecosystem and directly contribute to its growth.

Learn to earn: Earning \$LGCT for positive in-app achievement such as absolving quizzes and completing challenges.

Distribution of tokens to creators who share their wisdom and add to our content database.

Payment of various in-app purchases such as items, collectibles, content and more with LGCT.

Blockchain

The Legacy Token is available on blockchains like Ethereum, Binance Smart Chain and Base. The goal of multiple blockchains is to address as broad a target group as possible, as well as to use the individual advantages of the respective blockchains. The circulation supply of the respective tokens is balanced by means of atomic swap, so that the statistics of the tokens cannot change independently of each other. For transferring tokens between the different blockchains, the cross-chain bridge of safeswap is used.

This offers the following advantages:

1. We pay for the bridge integration, so our users don't have to pay bridge fees.
2. The bridge enables secure and simple atomic swaps between the respective blockchains.

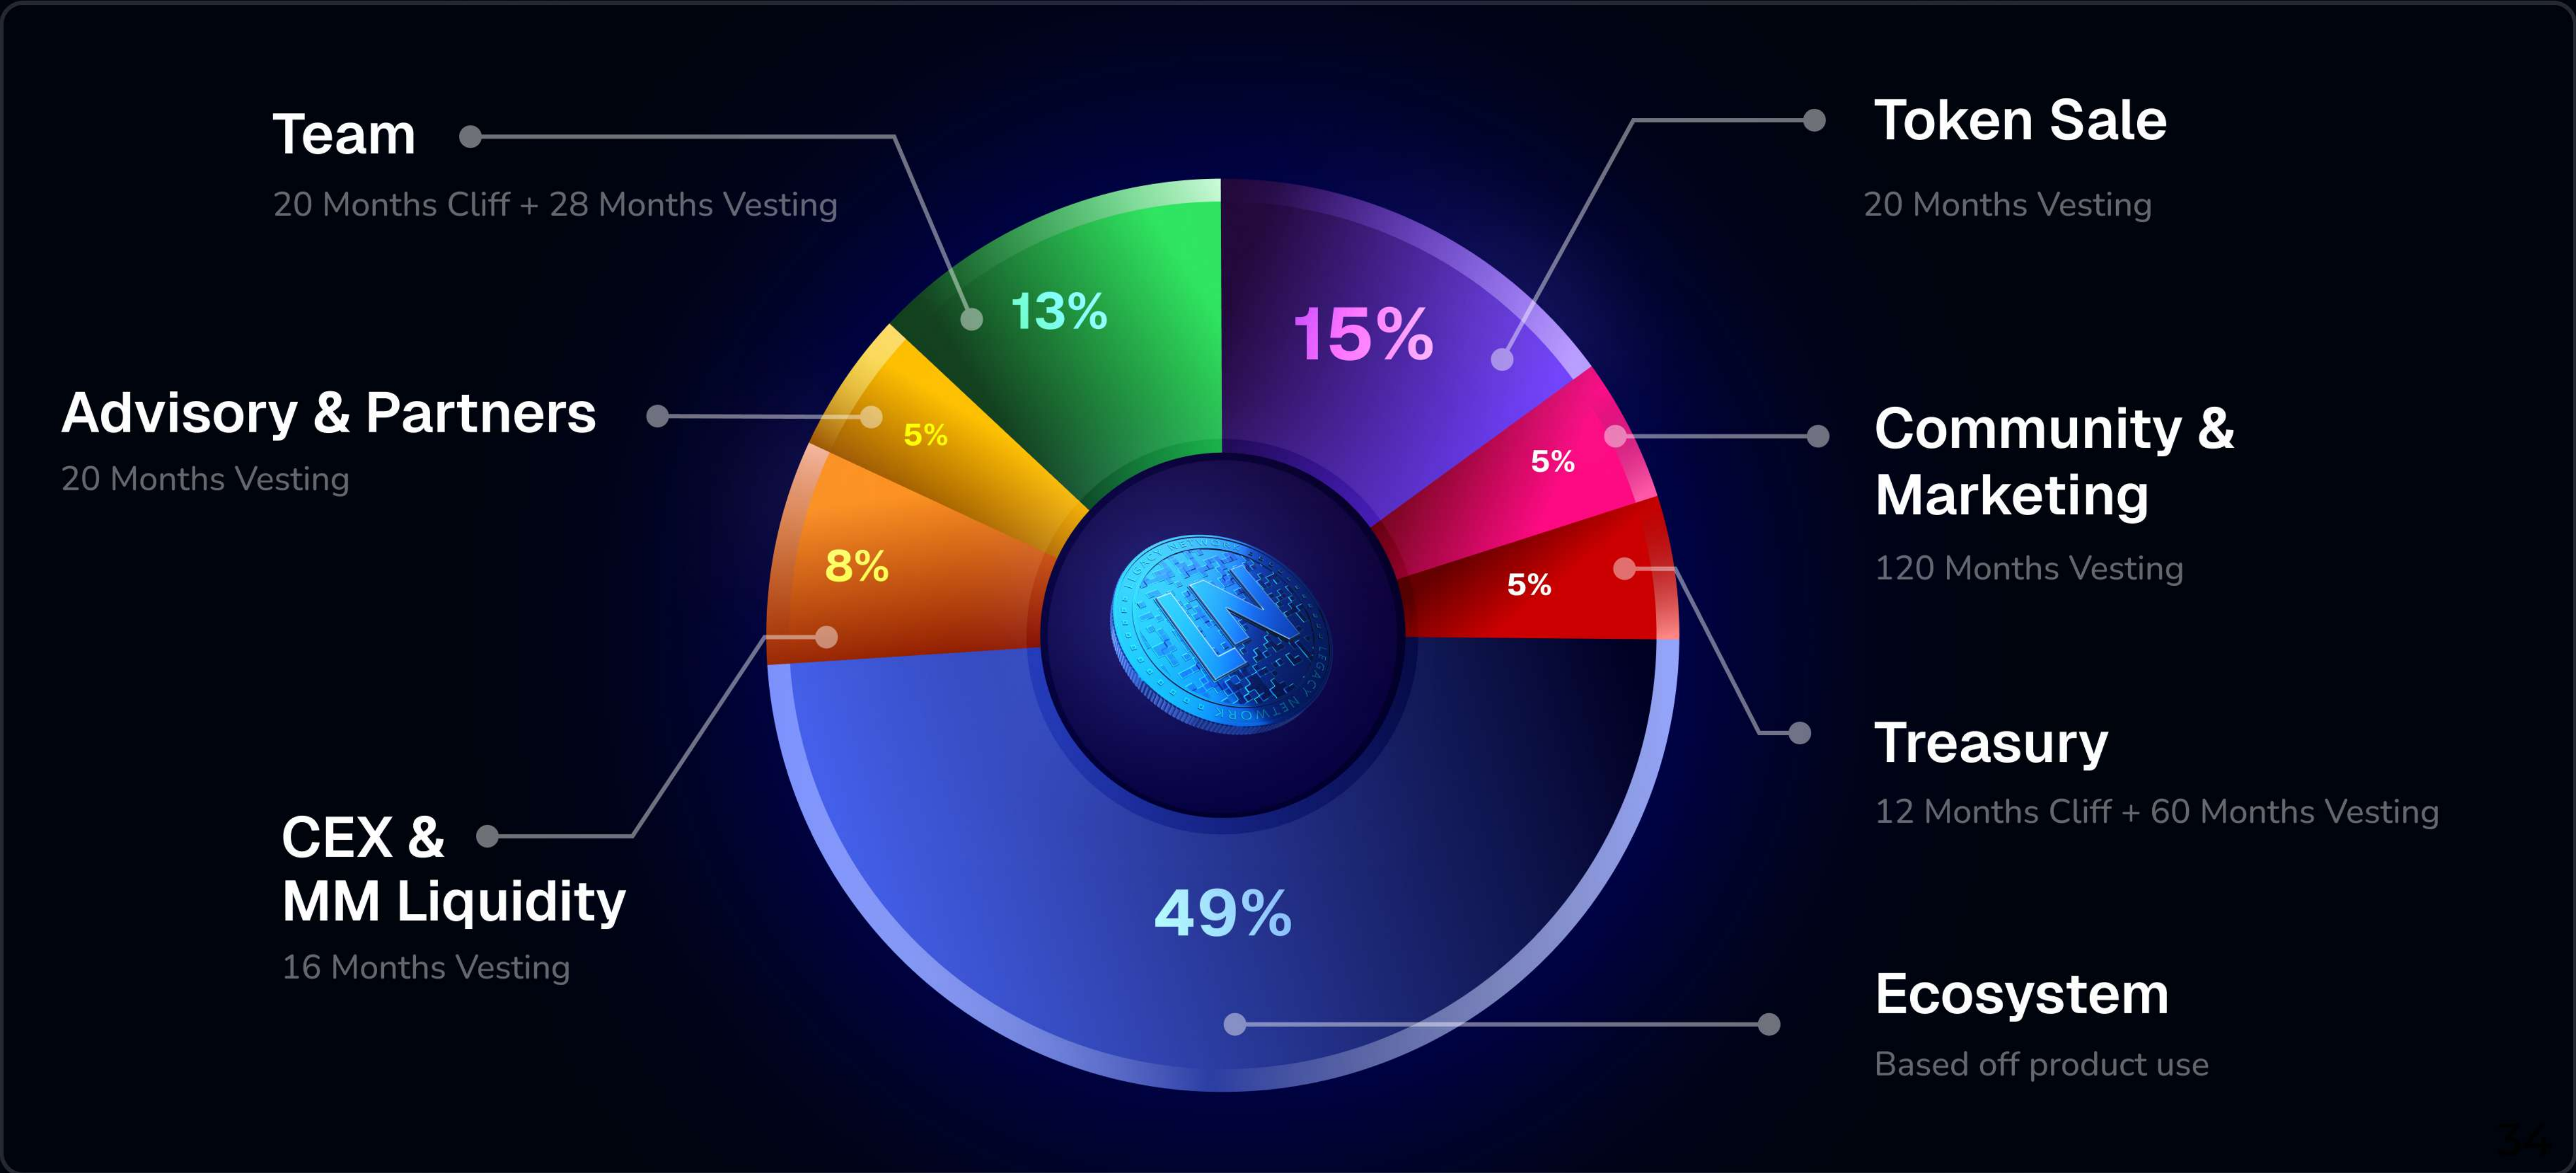

Tokenomics

Legacy's tokenomics are designed to promote the healthy and stable growth of our ecosystem.

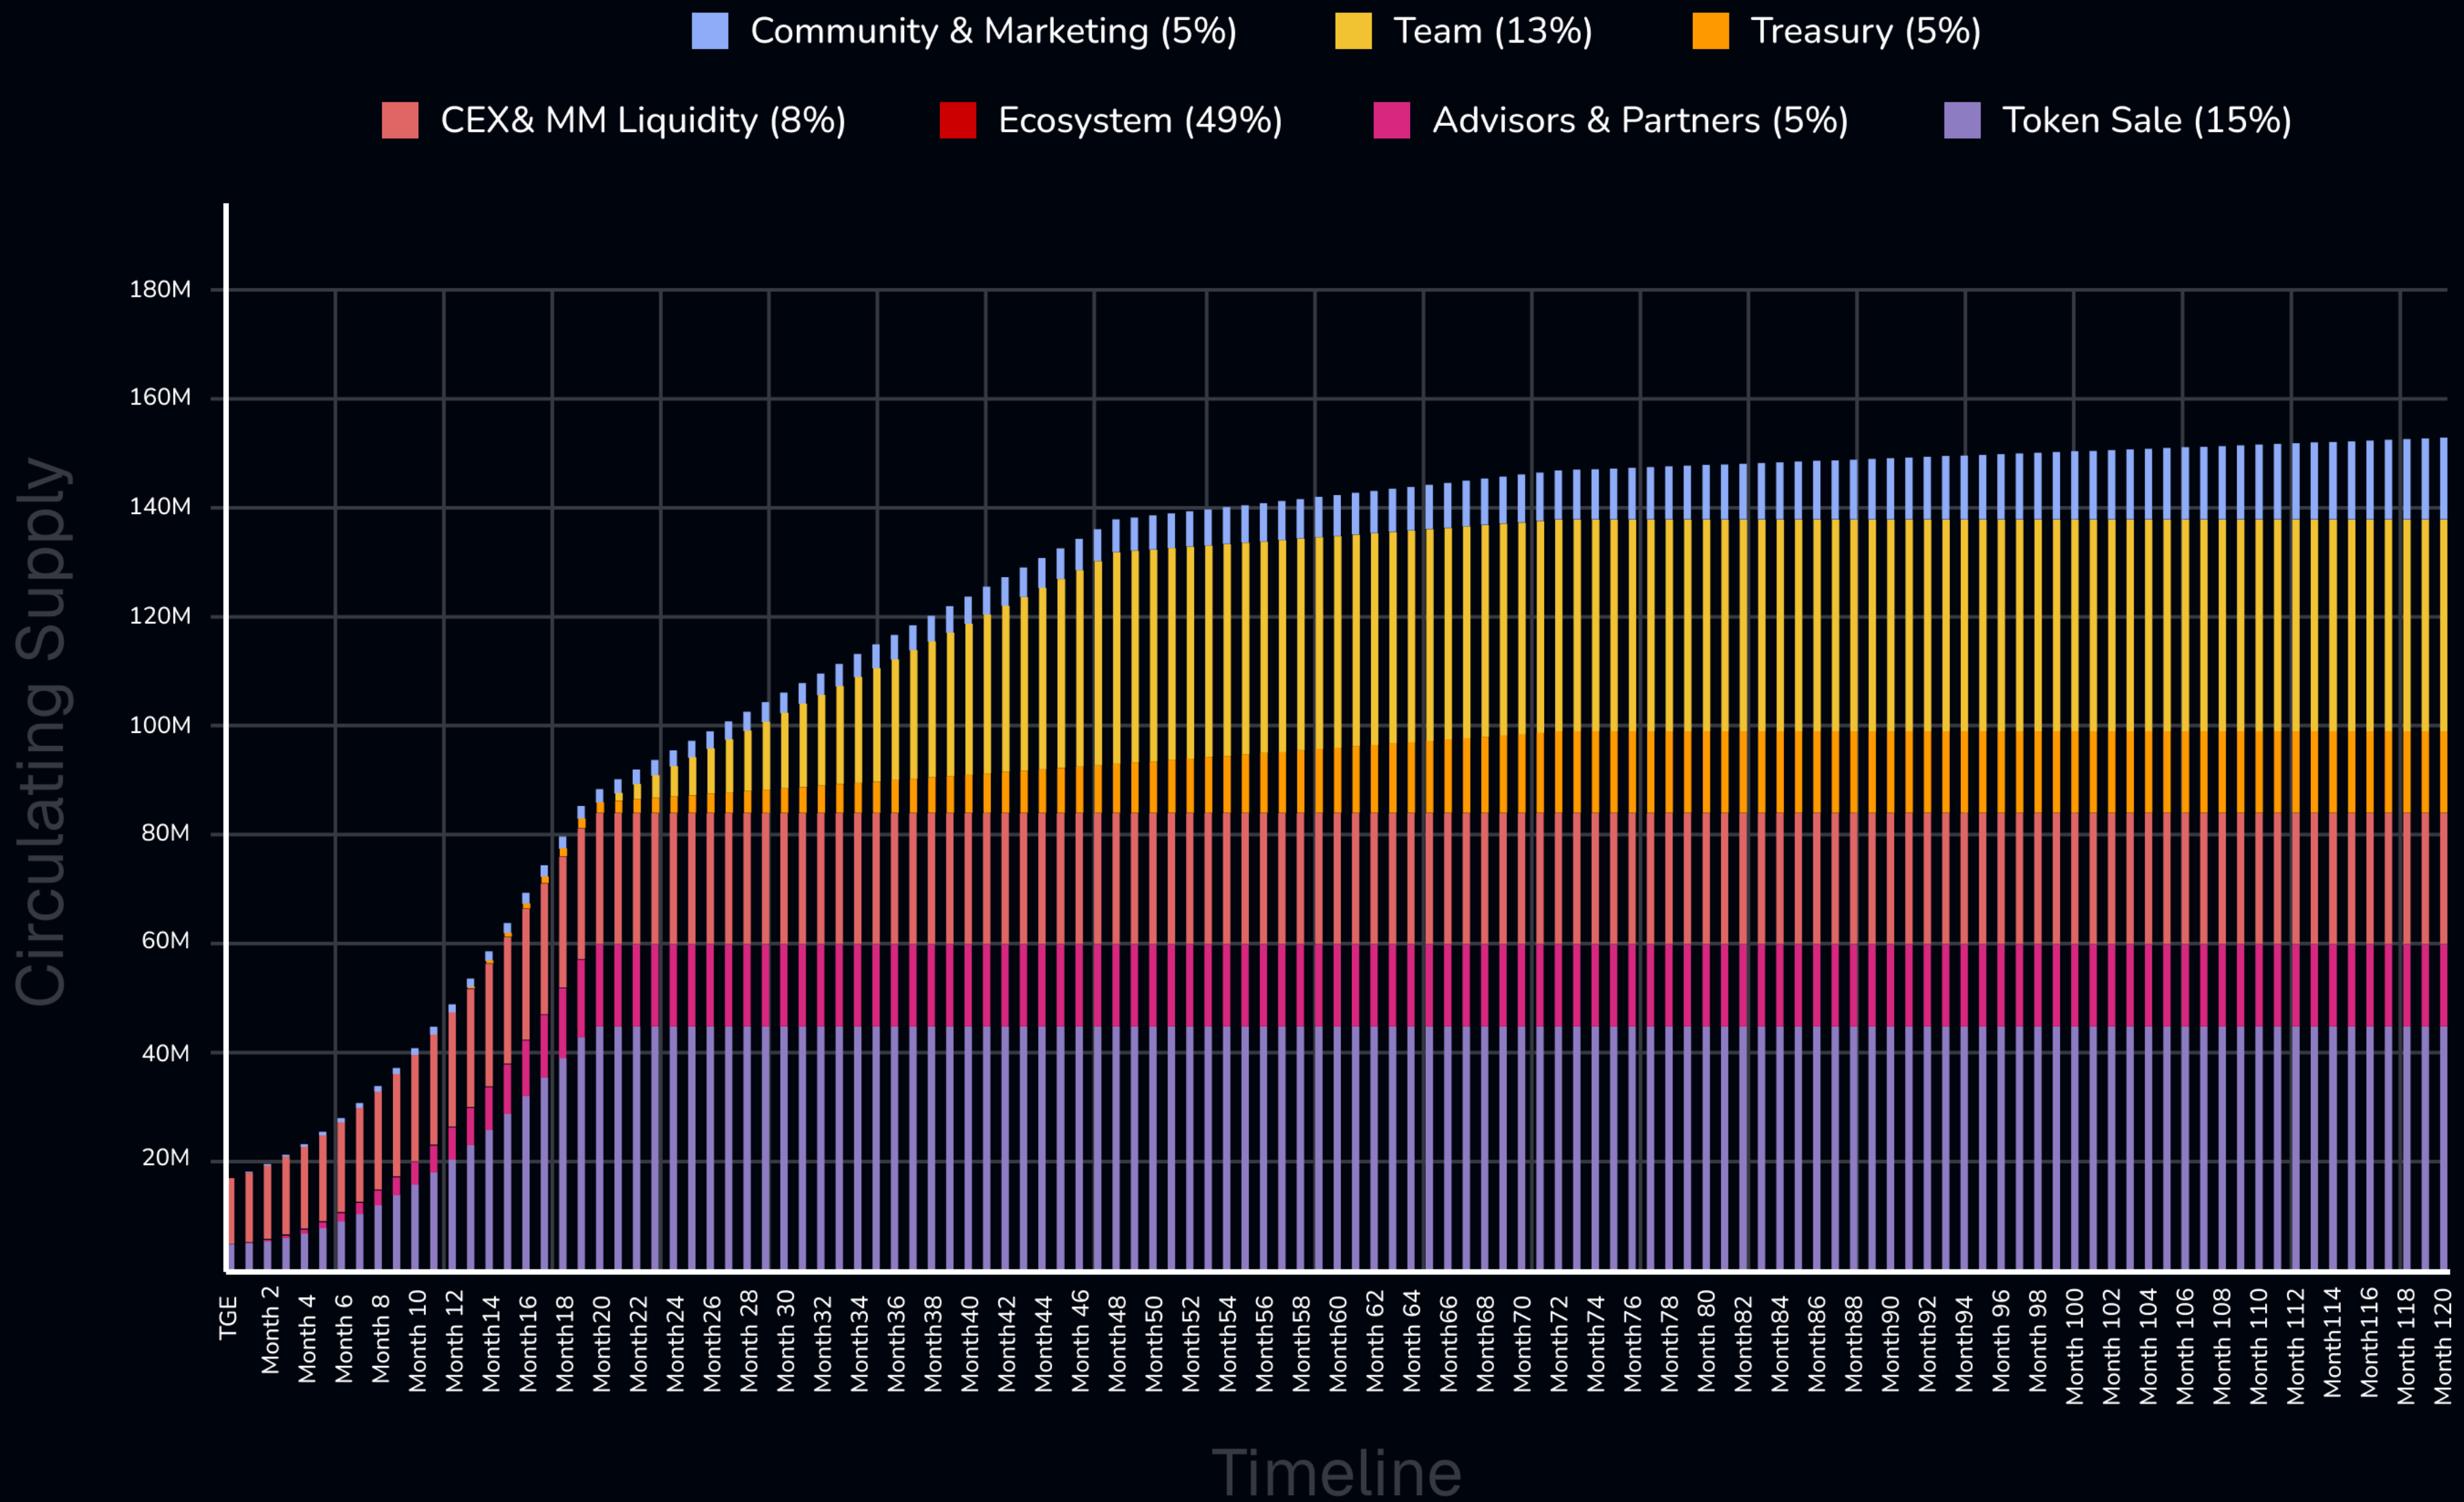

Our main goal is to create a **real utility token** with constant, non-speculative buy-side pressure. Due to our approach of offering a non-financial utility outside of the blockchain industry, the demand for our utility is expected to **not decrease in a bear-market**. The product **subscriptions are indirectly paid in LGCT**, this creates constant monthly demand for the token. A share of that revenue **flows directly back into the liquidity pool** and into the **ecosystem pool**. Between 5-10% of the remaining tokens are burned, which makes **LGCT deflationary**. Notably, our deflation mechanism, subscription burn system, and fair distribution encourage healthy and vibrant ecosystem growth over time.
